

CELLIBATION

WHERE THE PATH USED TO BE

A NARRATIVE PUZZLE GAME
ABOUT MEMORY, ROUTINE, AND
FINDING HOME.

BY GROUP: P15

GAME CONCEPT

WHAT IS IT?

- A narrative puzzle game where players experience the everyday journey home through the perspective of an elderly person living with Alzheimer's disease.

CORE IDEA

- Most people never think about how they get home.
- For individuals with Alzheimer's, familiar routines can become confusing, fragmented, and unfamiliar.
- Players reconstruct memories through puzzles while experiencing the gradual deterioration of memory.

WHY IT FITS THE THEME

- The theme asks players to see an everyday routine in a new way.
- Going home is something students and working adults do every day, yet Alzheimer's transforms this simple routine into a significant challenge.

INTRODUCTION

STORY OVERVIEW

- The player takes on the role of an elderly person attempting to return home after running errands.
- As the journey progresses:
 - Memories become distorted
 - Familiar places become confusing
 - Reality and memory begin to blur
 - The player must reconstruct memories to continue the journey.

EMOTIONAL JOURNEY

- Chapter 1:
 - Confidence
- Chapter 2:
 - Uncertainty
- Chapter 3:
 - Confusion
- Chapter 4:
 - Doubt and acceptance

TARGET

AUDIENCE

- The general public

AUDIENCE

WHY?

- Most players perform the routine of travelling home every day.
- The game encourages players to reflect on how something so ordinary can become difficult for individuals living with Alzheimer's disease.

AIM OF THE GAME

GAMEPLAY GOAL

- Reconstruct fragmented memories to successfully complete the journey home.

NARRATIVE GOAL

- Help players experience the confusion, uncertainty, and emotional impact of memory deterioration.

LEARNING GOAL

- Create empathy and awareness for individuals living with Alzheimer's disease.

GAME

FEATURES / MECHANICS

MEMORY RECONSTRUCTION PUZZLE

- Players:
 - Identify correct memories
 - Remove false memories
 - Arrange memories in the correct sequence

PROGRESSIVE MEMORY CORRUPTION

- Chapter 1:
 - No change, creating a sense of false security
- Chapter 2:
 - Texts changes abruptly leading to confusion and paranoia
- Chapter 3:
 - Memories become increasingly unreliable.
 - UI glitches and breaks, backgrounds becomes unstable

EMOTIONAL MEMORY TRIGGERS

- Recurring memories:
 - Chapter 1 shows a picture frame of the player's husband
- Chapter 2 and 3
 - Has thoughts that pop up, creating an emotional thread
- Chapter 4
 - The picture frame comes back comforting the player and completing the story loop

WHY WOULD THIS BE FUN/MEANINGFUL

ENGAGING

- Interactive puzzles
- Progressive challenge
- Mystery and suspense
- Unexpected UI breakage

EDUCATIONAL

- Raises awareness about Alzheimer's disease through gameplay rather than lectures.

MEANINGFUL

- Players experience an everyday activity from a completely different perspective.

MEMORABLE

- The narrative and recurring memories encourage emotional engagement and reflection.

DESIGN CHOICES AND TECHNICAL IMPLEMENTATION

PIXEL ART STYLE

- Fits hackathon scope
- Allows rapid asset creation
- Creates nostalgic, memory-like visuals

VISUAL DESIGN

- Chapter progression:
 - Bedroom - Normal
 - Grocery store - Small glitches
 - MRT - Heavy distortion
 - House - Severe instability
 - Memory association - Normal and fond feeling

DESIGN CHOICES AND TECHNICAL IMPLEMENTATION

AUDIO DESIGN (DIDNT MANAGE TO DO)

- Normal background sounds:
 - Birds chirping
 - Footsteps
 - Ambiance
- Calm piano background music
 - stick within confines of daily life
- Alarm

SYMBOLISM

- The recurring photo frame represents:
 - Stability
 - Family
 - Home
 - Emotional memory

FUTURE DEVELOPMENTS

ADDITIONAL FEATURES

- Multiple endings
- Voice acting
- More refined sounds
- More daily routines
- Expanded storyline
- More sophisticated gameplay loop

ACCESSIBILITY FEATURES

- Adjustable difficulty
- Colour-blind support
- Settings for:
 - larger text options
 - captions for future voice acting
 - varied amount of vfx
 - volume settings

EDUCATIONAL EXPANSION

- Partnerships with Alzheimer's awareness campaigns and educational organisations.
