Traffic Crosser

BuildingBloCS June Jam
Track: PyGame
Team: P10

A Road Safety Challenge

Inspiration & Objectives

What inspires us

This game is inspired by Crossy Roads which also simulates the dangers of jaywalking

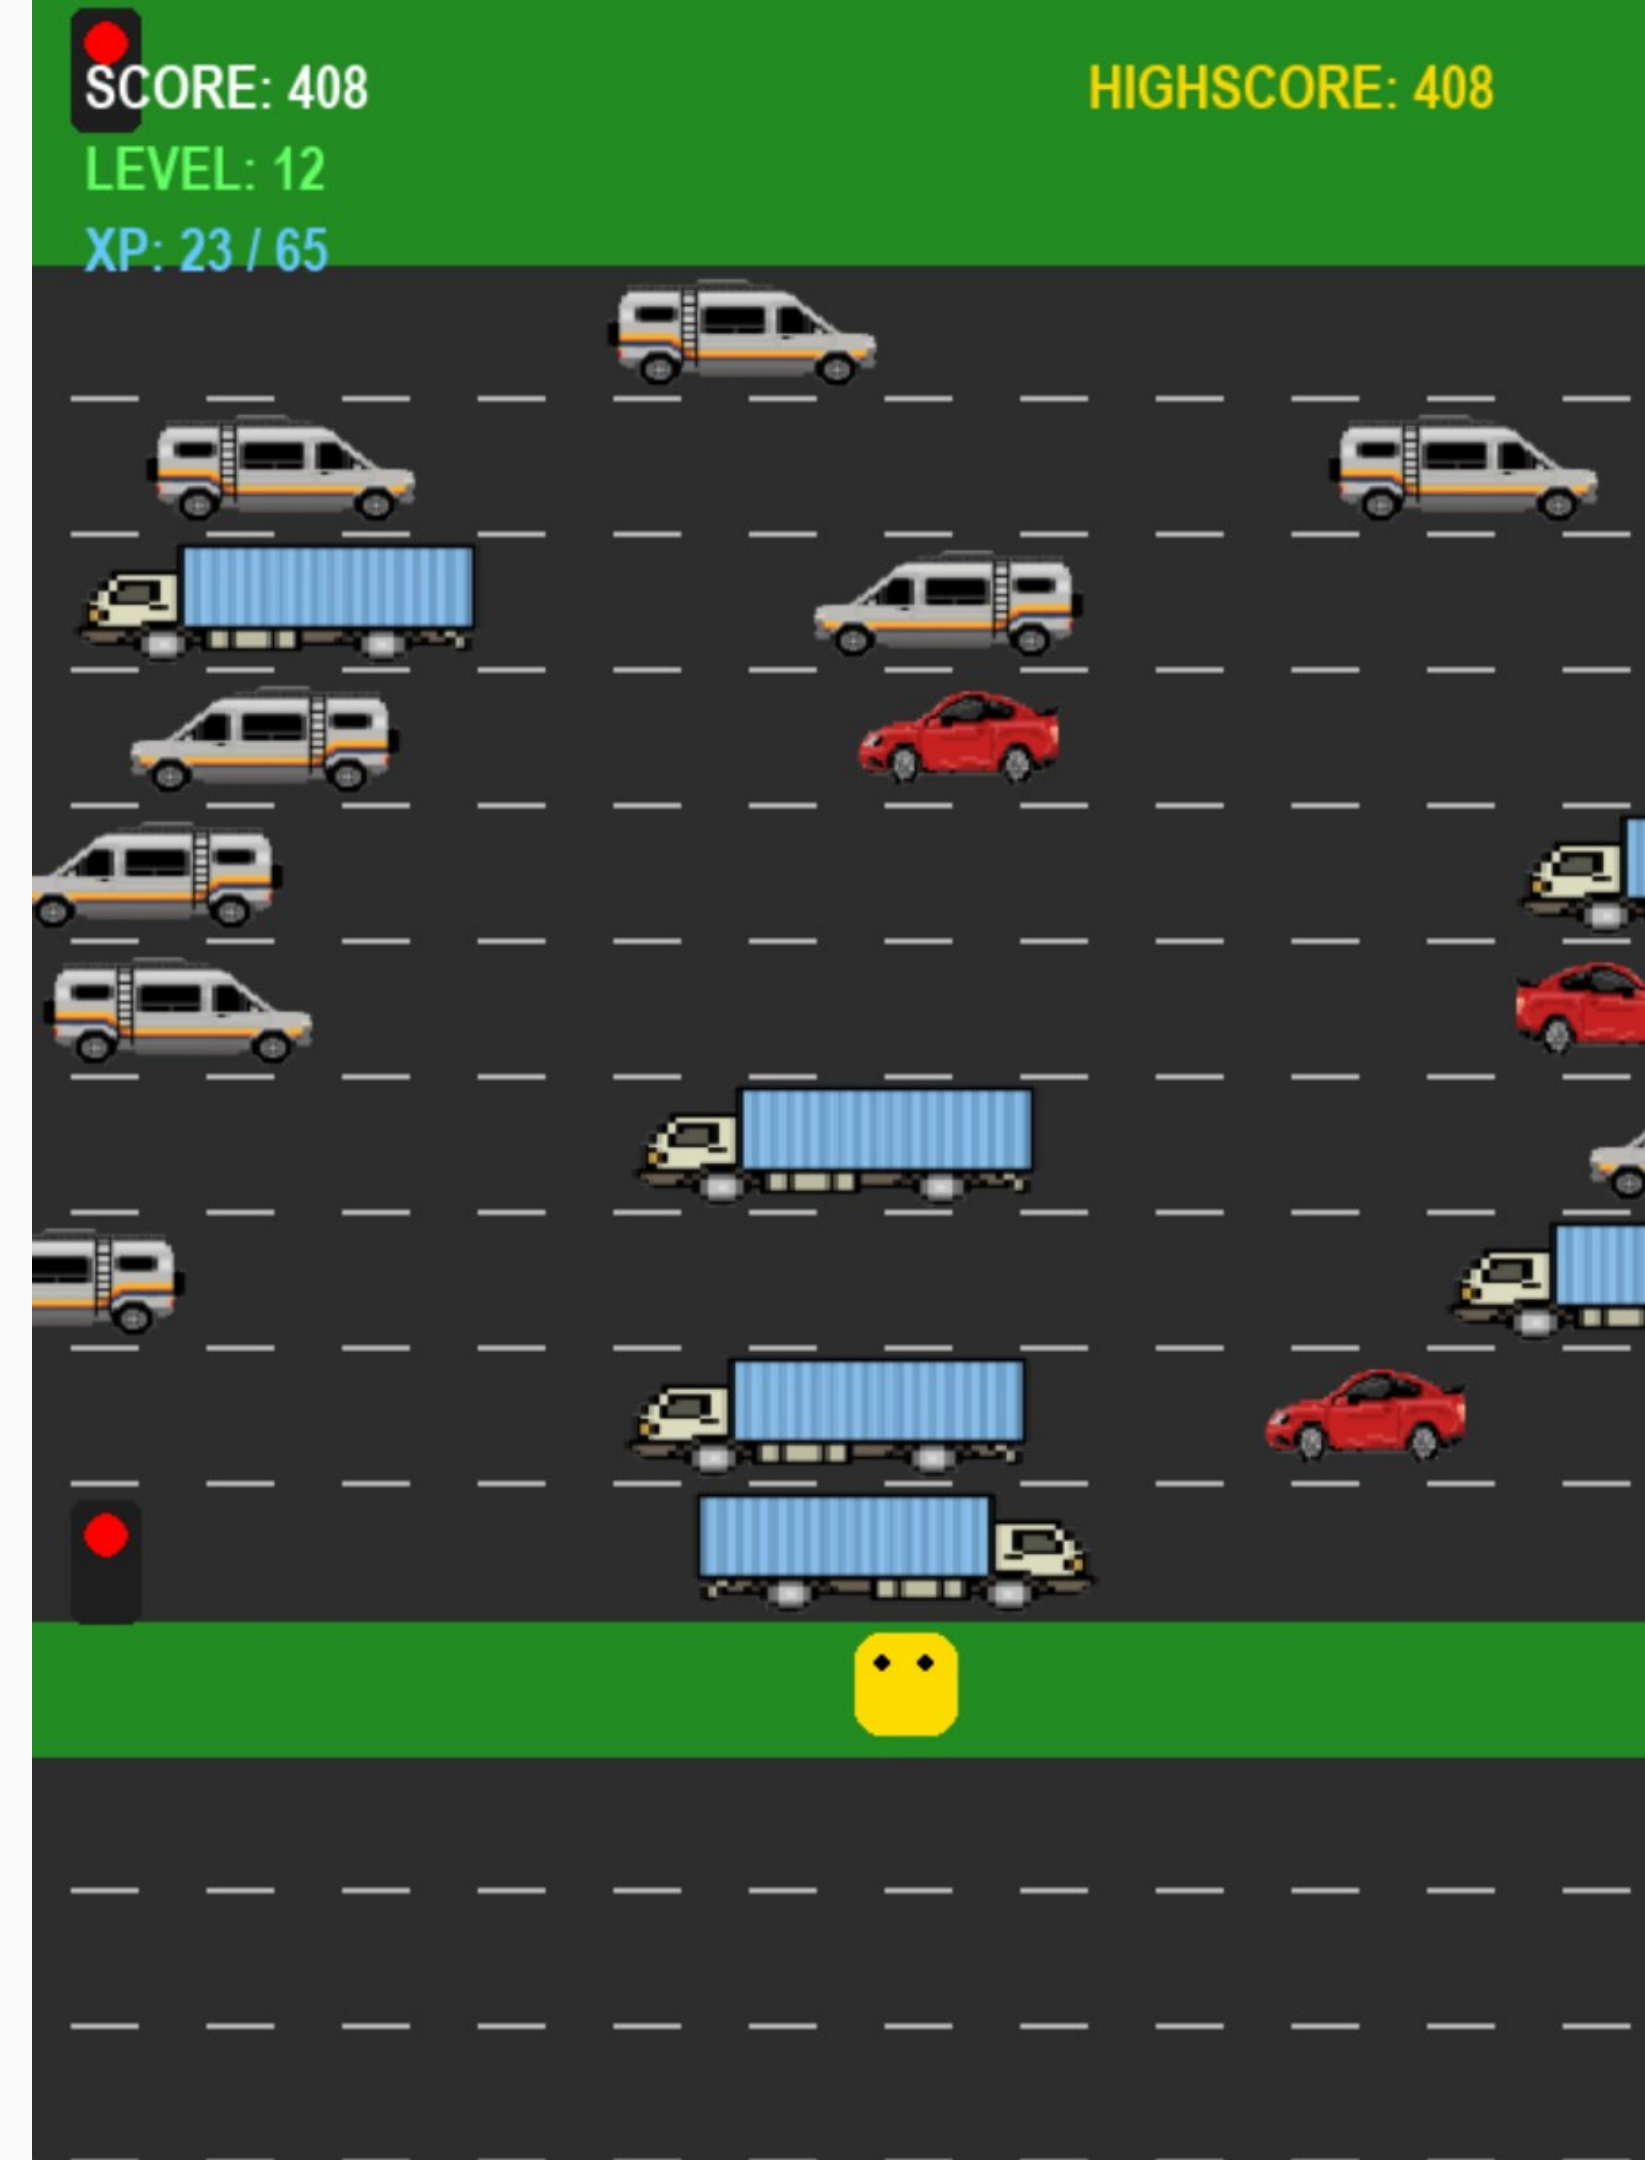

Objectives

Encourages players to make safe crossing decisions while combining fun gameplay

Gameplay

**AVOID VEHICLES,
TRAFFIC LIGHTS AFFECT TRAFFIC,
LEVEL UP**

Players has to avoid vehicles, while looking out for incoming traffic and while they progress, they gain XP which would let them level up, making the game harder gradually.

Key Features

Traffic Light
System

Multiple Vehicle
Types

XP & Leveling
System

Adjustable
Volume

Smooth
Movement

Challenges & Solutions

Vehicle Spawning Balance

Spawn timers and spacing checks

Smooth Movement

Interpolation system

Asset Dependency

Fallback graphics when assets are missing

Code Organization

Modular class-based design

THE END

We hope that jaywalking could be
prevented more
