

TABLETOP MADNESS

A game made by P12

CORE IDEA

Take on the perspective of a stressed-out parent dealing with the little shenanigans of their 3 year old toddler.

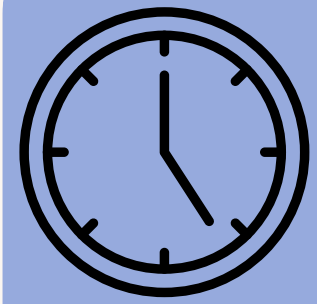

AIM OF THE GAME

01. Scrub, Scrub, and Scrub

Manage your time flawlessly to scrub stains and clear the table before the kitchen timer hits zero!

02. Race The Clock!

Oh No! You left your fresh batch of brownies in the oven! Finish clearing the table and retrieve your precious brownies before they burn to a crisp!

03. Toddler Chaos

A baby is trying to snatch away your plates! Slap their hands away before your plates gets stolen.

GAME FEATURES

The core game features include...

1. Multitasking
2. Interference
3. Stain and plate cleaning/clearing system
4. Oven (time) management

ANALYSIS OF THE GAME

Growing up with technology has made us more dependent on convenience, often causing us to overlook the things that matter. This game puts you in the perspective of a parent taking care of a young toddler while managing the house.

It lets you feel what parents go through to raise us, and makes you realise how much you may have taken for granted. The situations are relatable and grounded in everyday life, making the lessons you pick up along the way easy to apply in real life too.

EXPECTED RESULTS

01

Reflection:

This game encourages us to think about our own childhood and the things we may have taken for granted.

02

Gratitude:

It helps us appreciate our parents more, having experienced the challenges that our parents faced.

03

Awareness:

Players gain a better understanding of how much effort is put into running the entire household and parenting.

TECHNICAL IMPLEMENTATIONS

Custom Object-
Orientated Classes

Dynamic Baby-Hand AI

01

02

03

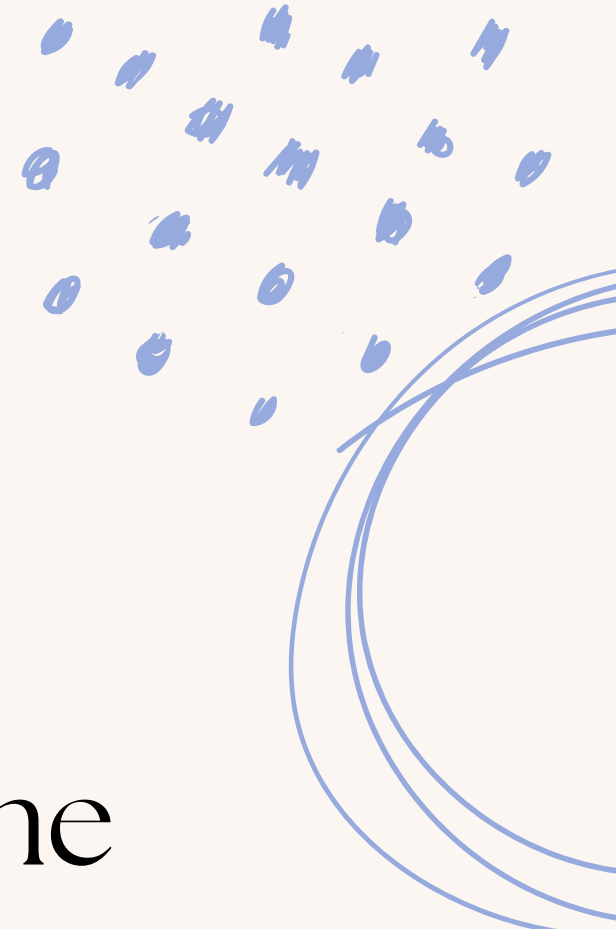

04

Drag logic

Collision detection

DESIGN CHOICES

1. Stain cleaning requires a modifier key
2. Baby hands approach from left or right
3. Hand cursor changes on interactions
4. Timed baby hand spawn

FUTURE DEVELOPMENTS/PLANS

1. Clearer tutorial system (playthrough)
 2. Better design of sprites/assets
 3. Range of difficulty systems, ability to customize game mechanics
 4. Progression system (multiple stages, introduction to new characters/mechanics)
 - ✓ ✓ ✓ ✓ 5. Have the baby play more of an antagonist role, being fully on the table and having special abilities mimicking a fantasy boss
- 
- 

INSPIRATIONS!!

We were originally inspired by the stressful and fast-paced nature of games like Overcooked and Cooking Fever, having to multitask while being limited by a time-constraint.

CONCLUSION

This started as a game about the mundane and ended up being a reminder that the mundane is anything but. We are proud of what we built and excited about where it can go and we hope this gave you a new way of looking at the everyday things you might have stopped noticing.

THANK YOU
VERY MUCH!
