AFTER US

They left. You stayed. Now survive.

An introduction to After Us — a survival-adventure game built with Pygame, where a lone cat navigates a post-human world.

Built with Python + Pygame

The World

A Planet Without People

Streets cracked open by roots.
Parks swallowed by forest.
Home is unrecognisable.

Wild animals roam where
people once lived.
Weather has grown extreme
and unpredictable.

Silent. But alive.
And not always safe.

PROTAGONIST

Meet the Hero

Your Cat

Name

Whisker (customisable)

Once a pampered housecat. Left behind.
Starting over with nothing.

Curious by Nature

Driven to explore every corner of the unknown world

Fragile but Agile

Climbs, leaps, and squeezes — but one wrong move costs dearly

Fast Learner

The world is harsh. Whisker adapts faster than it falls.

Nine Lives

Limited respawns — every life lost raises the stakes

→ Every great journey needs someone worth following. ←

Core Story Arc

A journey from confusion to belonging — told in three acts.

ACT I

Awakening

The home is empty. The door is open.

The cat takes its first steps into a world left behind.

ACT II

The Wild Reclaims

The city has been swallowed.
Wild things rule now.

Survive the terrain. Survive the weather. Survive.

ACT III

Adaptation

It learned to hunt. To shelter.
To read the wild.

This world is not lost — it is home.

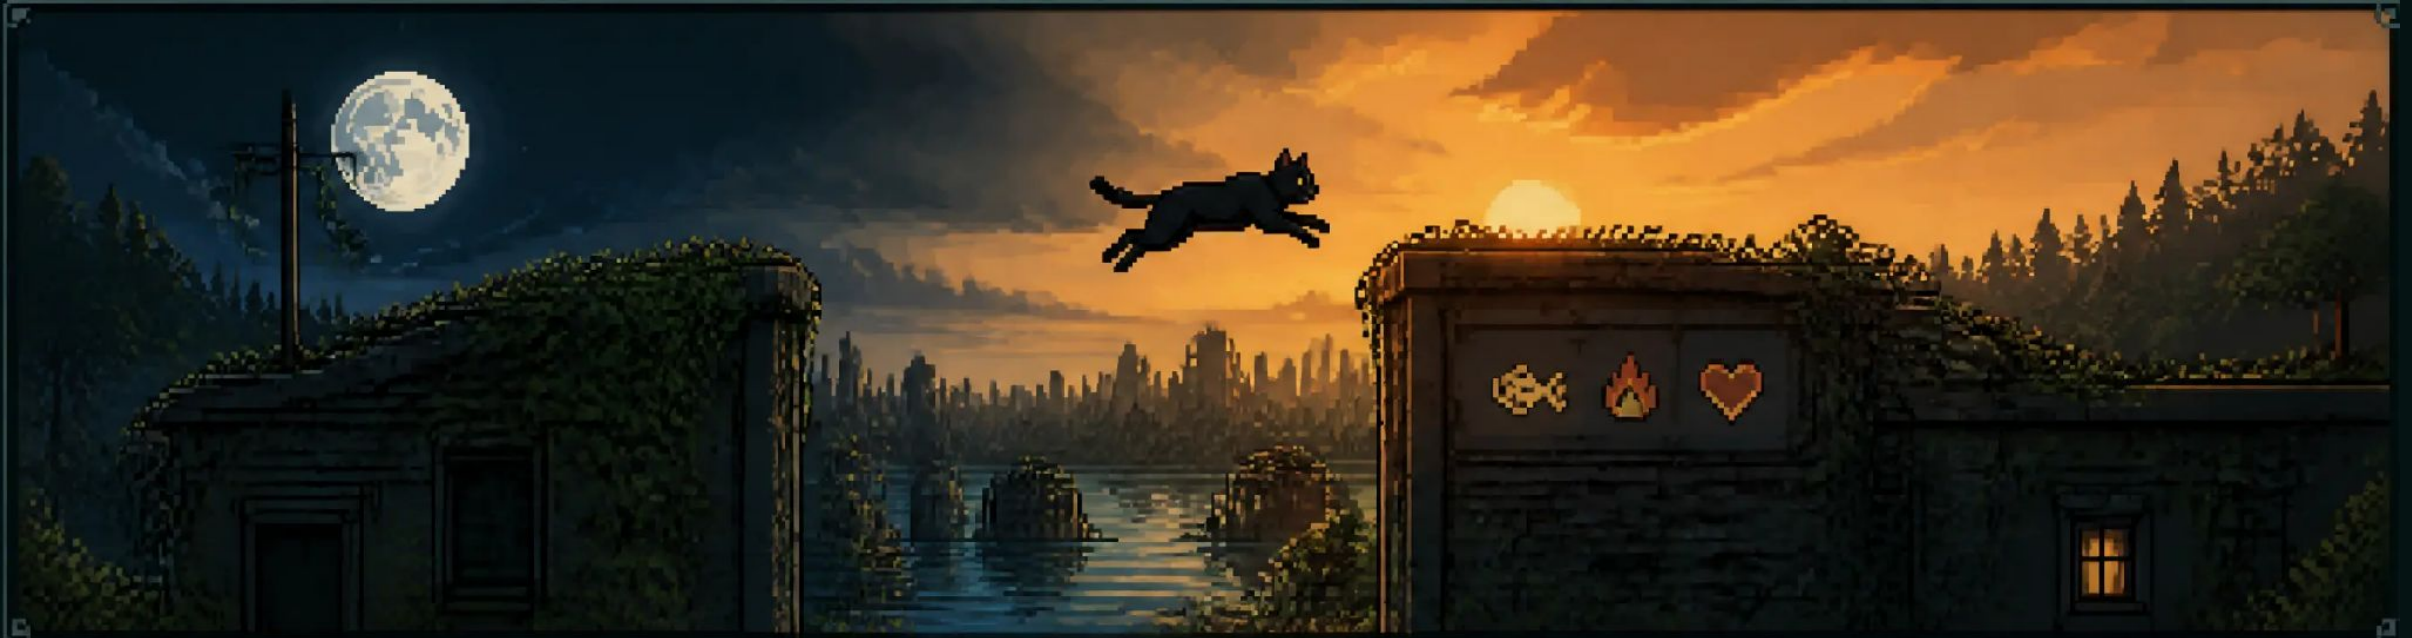

The game ends not with defeat or rescue — but with belonging.

Gameplay Overview

2D Platformer · Survival · Exploration

<https://chrome.soundation.com/project/f97e6a8f-ef73-4cc3-a040-f3e02e27543d>
The music for the gameplay

Side-Scrolling

Explore, climb, leap

Varied Worlds

City · Forest · Flood · Volcano

Survival Stats

Hunger · Warmth · Health

Day / Night Cycle

World changes as time passes

Grow & Adapt

Unlock skills through survival

NATURAL DISASTER CHALLENGES

The world is unstable. Every disaster teaches a new way to survive.

FLOOD

Rising waters — find high ground or learn to swim.

WILDFIRE

Spreading flames — fast navigation and escape puzzles.

TORNADO

Debris hazards and wind physics that push your every move.

THUNDERSTORM

Reduced visibility, falling trees, electrical hazards.

VOLCANIC ASH

Air quality depletes — find shelter before health runs out.

EARTHQUAKE

Crumbling platforms and collapsing structures to navigate.

Each disaster unlocks an adaptation. Survive it once — carry it forever.

ADAPTATION SYSTEM

Every disaster makes the cat more capable.

WORLD MEMORY

Revisited areas show regrowth – the world remembers your journey.

RESILIENCE OVER PERFECTION

Failure is part of the story.
Every fall teaches the next leap.

Surface Grip
Hold on through wind and chaos.

Precision Balance
Read the ground.
Time every leap.

Swimming
Navigate flooded zones freely.

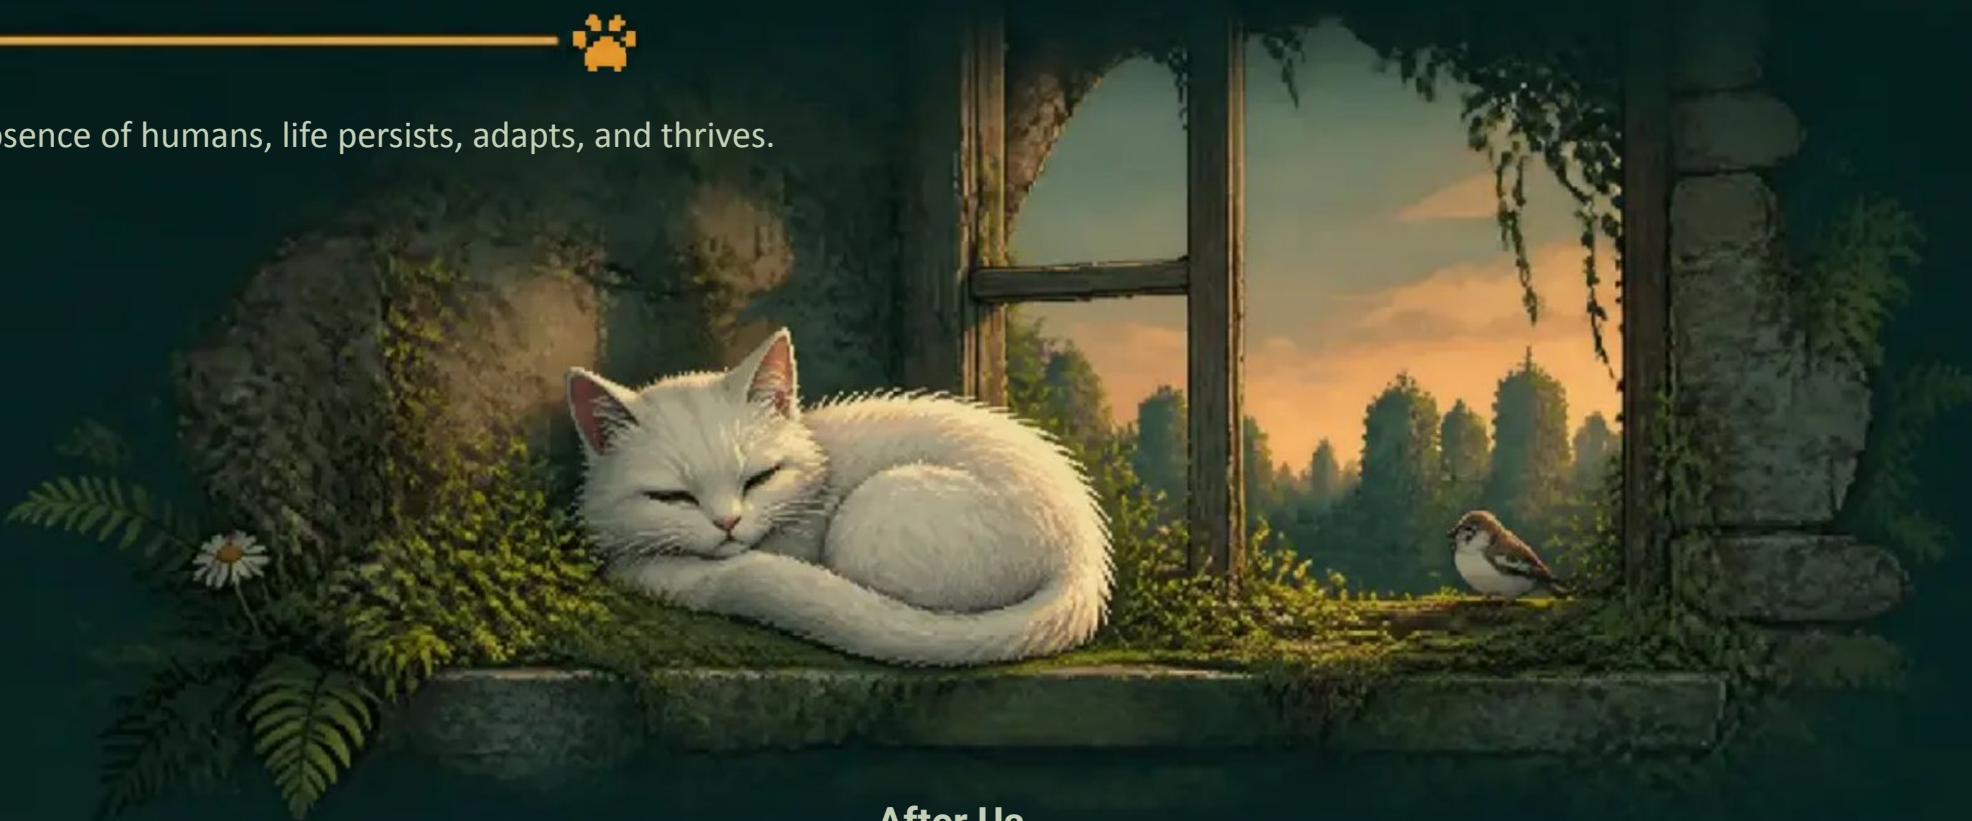

Heat Resistance
Sense fire ahead.
Endure the heat.

Thank You

Even in the absence of humans, life persists, adapts, and thrives.

After Us

Built with Python. Powered by curiosity.
