

Eraser Buddy

Done by P28: Belicia, Mavis, Syesha, Shriraam

A story about an eraser come to life and one very bored student.

Introduction to the Game

What is the game's plot?

Game centers the bored main character and their eraser which can somehow talk. The game is split into 3 sections:

1. Day 1&2 □ MC meets eraser and their bond starts so slowly form as they interact more
2. Day 3&4 □ Real world experiences are brought in (Drawing on eraser, using it for MCQ gambling) & friendship between the two deepens
3. Day 5 □ Ending – left wondering if it was even real

Engine

Python / Pygame

Theme

School-Based

Structure

5-day narrative

Style

Text-based adventure/ kinetic novel

Target Audience

Narrative Fans

Game is story heavy with the main focus being the bond that forms between the main character and the eraser.

Hence, the game appeals to an audience that prefers a narrative focus and an interest in the characters relationships rather than a eg. Action-packed first-person shooter

Cozy Gamers

Cozy gamers □ People who play games to relax/ for comfort

The events the game covers is more slice-of-life school-based events which may resonate with cozy gamers with its low stakes and light-hearted dialogue

Aim of the Game

01

Explore the theme of finding wonder in ordinary objects through the unrealistic scenario

02

Bring a sense of magic and humour into otherwise mundane activities

03

Leave the player appreciating and noticing the little things more

Game Features

Narrative/Story driven:

Mainly focuses on the relationship between the two main characters □ the player and the eraser

Slice-of-life/fiction:

Plot is light-hearted and has elements of fantasy
(with the talking eraser)

Mechanics

Skip dialogue option:

Benefits players with faster reading speeds/ wanting to go at a faster pace

Can skip dialogue animation/ dialogue fully in order to progress faster in the game

Why Would This Be Fun/engaging?

Relatable setting reimaged

The setting of game is extremely relatable as many people have gotten distracted or felt bored in class.

The game takes experiences many people have gone through and reimagine it by making an inanimate object, the eraser come to life, something many people have also imagined.

This makes the interactions of the game and plot familiar yet new as players see how the relationship between the two development

Short and sweet

The story in content packed by short, allowing the players to get plenty of satisfaction in the small amount of game time

Character relationships

Players get to witness the main character and eraser form a friendship through their banter and conversations. The first person pov allows players to feel connected to the characters in the game

Design Choices & Technical Implementation

Design

Blurred classroom background for main menu —> keeps focus on text while hinting at the setting of the game

Warm game palette □ Makes the game more cozy

Pixel art □ Make visuals more appealing while keeping the game simple and vibrant

Technical

Python + Pygame — Used to code the game and allow it to function

Dialogue system: structured text dictionary with timed display

Future Developments

Expanded Story

Additional school days and giving the players dialogue options to choose which affect the game further down □ multiple endings

More Object Friends

Introduce other stationary objects(Eg ruler, pencil, stapler), each with their own personality and mini-arc.

More Scenery/ art variation

More background changes/ animations in objects, allowing the game to come to life

Audio

Sound effects for dialogue skips, emotional expression, background music etc

More intuitive interface

Options menu so players can pause the game, adjust sound, and save

Thanks for listening!
