— Game Concept

1

Kick the bottle into the trash can

— Target audience

People who do not
dispose their waste
properly

Aim

- SCORE AS MANY BOTTLES INTO THE TRASH CAN AS POSSIBLE IN 360 SECONDS

OR

- SCORE FIVE BOTTLES INTO THE TRASH CAN

— Features/ Mechanics

Players will kick the bottle continuously in the direction of the trash can aiming at the trash can.

Why would this be fun/useful?

We believe that our game is fun and useful for the following reasons;

Teaches recycling

Our game teaches people to recycle their litter responsibly in a fun and enticing way

Uses the ideas of football

Our game integrates ideas of football with recycling trash so that we could make the game attractive while teaching them to recycle waste properly

Many like it

Many of our friends like to watch and/or play football so we thought that by using elements of football, we could make our game about recycling more enticing and fun.

— Live Demo

We will now be showcasing our game!

— Design choice and technical implementation

- Tried to make the game as simple as possible so that the game is very user friendly
- We made class game, class player, class bin, class bottle

Roadmap - Future developments

Phase 1

Design the
characters better

Phase 3

Make the bottle
bounce more
realistically

Phase 2

Improve the hitbox of
the trash can

Phase 4

Add more
gamemodes

Lessons from AI and methods used

Some stuff we learned and used

- PYTHON BASICS MADE THE WHOLE GAME POSSIBLE
 - ORGANISING THE CODE HELPED
 - VARIABLES HELPED SIMPLIFY THE CODE
-
- LEARNT EVERYTHING ON PYGAME
 - CODED A SIMPLE SHOOTING GAME
 - CHARACTERS DRAWN ON PISKEL ART

The End

THANK YOU FOR LISTENING
