

SOCK FRENZY

Catch falling socks with your trusty bucket in a
fun arcade game

By : Team P9

SOCK FRENZY

Save the socks!

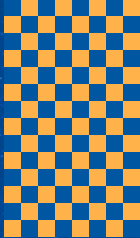

Arrow Keys to Move

Catch falling socks!

You have 60 seconds!

PRESS SPACE TO START

Introduction

Sock Frenzy is a casual arcade game where players move a **bucket** to catch falling **socks** before they hit the floor.

It has simple mechanics, quick sessions, and is growing challenge which makes it ideal for the users to have small breaks.

01 Game Overview

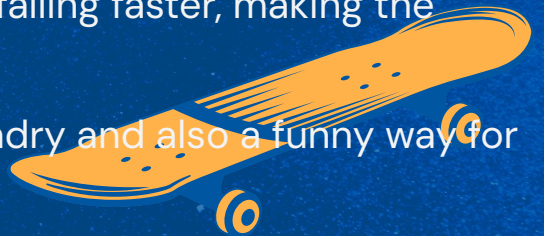

Concept

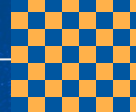

- Laundry is part of everyone's daily life and inevitable
- most people do it on a regular basis
- it has high potential for being chaotic and having this clothes misplaced
- this mostly leads to people thinking that doing the laundry is an unpleasant experience

However, Sock Frenzy provides a different perspective. In Sock Frenzy, socks continuously fall from the top of the screen, and the player must move a bucket to catch them.

The game starts at a comfortable pace, allowing players to learn the controls. As players score more points and progress through levels, the socks begin falling faster, making the game increasingly difficult.

This progression represents the growing chaos of managing laundry and also a funny way for people to think about doing laundry.

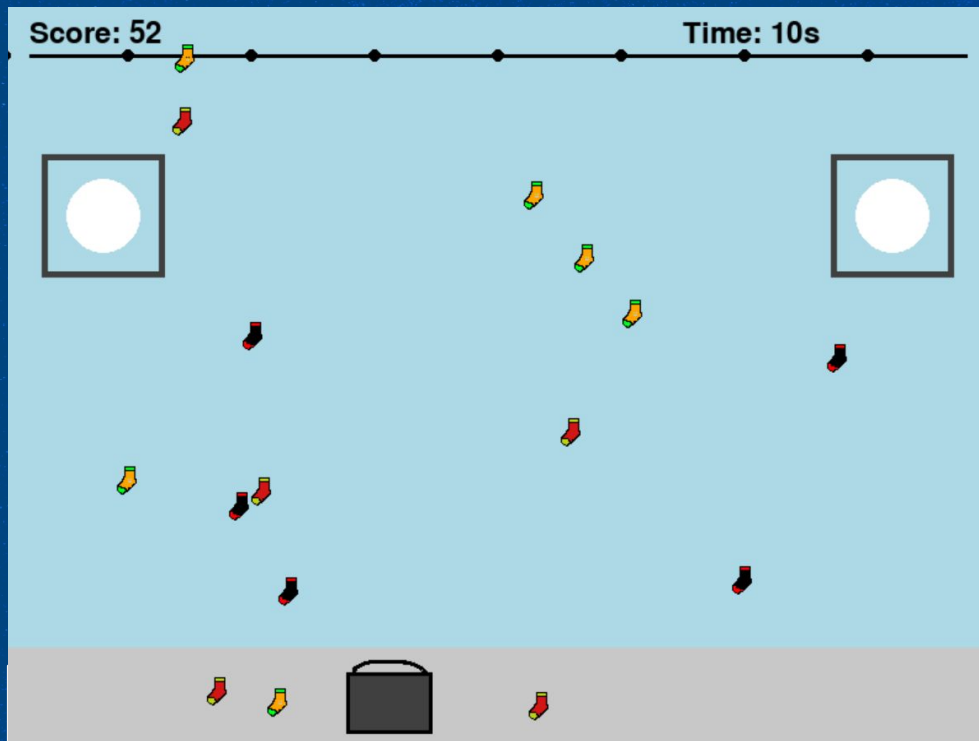

Target Audience

Our target audience includes:

- Children and students
- Casual gamers
- Families
- Anyone looking for a quick and entertaining game

The game is designed to be accessible because it uses simple controls and has a clear objective. Players can start playing immediately without needing prior gaming experience

What are the Visual Styles we had adopted?

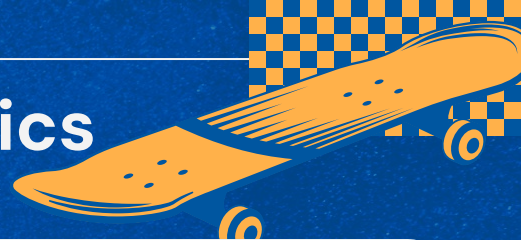

- Included bright, playful art with bold colors and clear silhouettes to make socks and the bucket instantly readable.
- Used Simple UI to have simple actions in the game
- Simple animations to make the game more fun and snappy

02

Gameplay Mechanics

Game Features and Mechanics

Controls

← → Arrow keys to move the basket

Colorful Socks

Random colors fall from the clothesline

Dynamic Difficulty

Socks spawn faster as time runs out

Score System

Each caught sock = +1 point

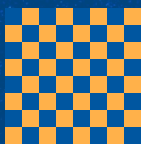

Time Pressure

60-second countdown timer

Collision Detection

Simple touch-based catching mechanics

Main Objectives Of Game

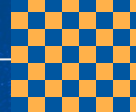

- Complete the objective within 60 seconds
- Catch as many falling socks as possible
- Beat your high score and improve reflexes
- Difficulty increases as time goes on

Why is it Fun?

- Relatable & Funny
- Easy to pick up and learn
- Quick rounds (60s)
- Score chasing
- Open to everyone

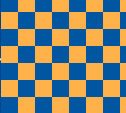

Levels & Difficulty

Progressive difficulty with faster fall rates, more sock varieties, and occasional obstacles each stage.

Short rounds with escalating challenge allow quick plays and satisfying skill growth.

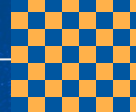

Lets now see the game in action!!!

1. Start screen appears with instructions
 2. Press SPACE to begin the 60-second countdown
 3. Socks start falling from the clothesline at the top
 4. Use ← → arrow keys to position your basket
 5. Catch falling socks to increase your score
 6. Socks spawn faster as time runs out (difficulty increases)
 7. When time ends, game over screen shows your final score
 8. Press SPACE again to play again!
- 
- 

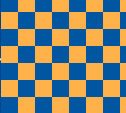

What are our design choices?

Simple 2D Graphics	Used basic shapes like rectangles for smooth rendering
Game States	3 states: Start screen, Play, Game over – used this for convenient and clear flowing structure
Progressive Difficulty	Spawn rate decreases over time : players are engaged
Keyboard Controls	Simple arrow keys which is intuitive for beginners
Sock Assets	Created using Piskel.com

Main Code Architecture

Dataclasses:

- Sock Class - handles falling socks (position, speed, drawing)
- Player Class - controls the movement (movement, collision detection)
- Game Class - main logic (spawning, updating, collision checks, score)

Others:

- Collision detection - Uses `pygame.Rect.colliderect()` for simple, fast detection
 - Commented Code - to discuss and understand when referring to code
- 
- 

What are some assets and tools we used?

Python

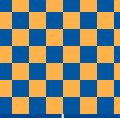

Language for game development

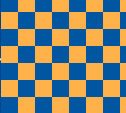

Pygame

Game library for graphics and game logic

Piskel.com

Free online pixel art editor for custom sock sprites

What are some future developments that we have thought about?

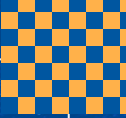

- Power ups : Special socks that have more points
 - Different difficulty levels : Easy, Medium Hard
 - Sound Effects and Music : Catch sounds, background music
 - Multiplayer : Competitive or cooperative modes
 - Mobile / Tablet version : touch controls for mobile/tablet gameplay
- 
- 

Reflection

- Applied some skills we learnt from the workshop
- Separating code into classes makes everything manageable
- For a project to be successful, it doesn't need to be flashy or very complicated
- Creativity and Simplicity matters
- Code is a key way of communication
- Organised code allows others and ourselves understand the logic

Conclusions

- Sock Frenzy is a light, and fun game focused on quick fun and replayability.
- It is very simple to play and a good way to take small breaks between our hectic schedules.
- Game designing and coding involves a lot of creativity and innovation.
