

GROUP U12

HAPPY CAT HOUSE

A Horror Game With A Cat!?

INTRODUCTION

We are team U12. In our team everyone is an ideator and contributes to the complete game. Through our agreements and disputes, we have come up with a game made with the best of our ability and we hope you enjoy it!

OUR TEAM

CALVIN

Lead 3D Game Artist
and Team Coordinator

JANICE

Lead programmer and
Sound designer

OUR TEAM

XU BIAO

Narrative designer and
Video game composer

MICHEAL

Technical writer and UI
designer

TABLE OF CONTENTS

Game concept, Introduction to game, Aim of game
- ✦  **02 AUDIENCE AND PURPOSE**
Target audience, Why this game is fun and useful
- ✦  **03 GAMEPLAY AND DESIGN**
Gameplay mechanics, Design and Tech
- ✦  **04 FUTURE PLANS**
What will our game become in the future?

01

OVERVIEW OF THE GAME

Concept Introduction Aim

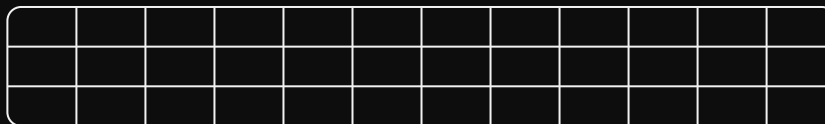

CAT
LOVERS?

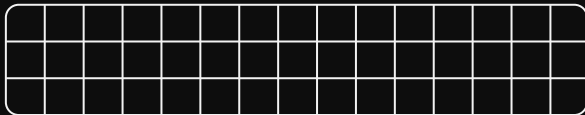

PARANORMAL HORROR?

GAME CONCEPT

Our game is a 3rd person horror survival game where players avoid the ghost by staying in the light and keeping quiet as a cat.

INTRODUCTION TO THE GAME

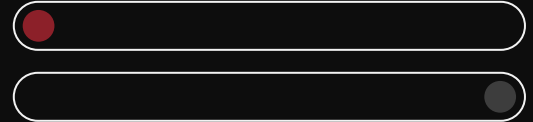

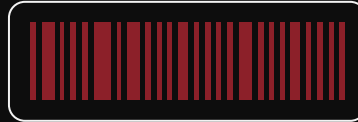

The game is set in today's world where a cat is left alone at home while the owner is on vacation. In this world, cats can see paranormal activity and are prey to the ghost. Ghost are attracted to the life force of all living organisms except for humans as humans have a wavelength of life force that repels ghost. Another thing that repels ghost are light. Thus, everynight, the cat would have to scramble through the house to find an light source to be in safety.

AIM OF THE GAME

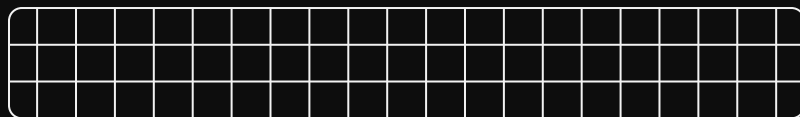

The player has to survive
3 nights before the
owner arrives back at
home

AUDIENCE AND PURPOSE

Audience and Fun factor

TARGET AUDIENCE

Someone who either
loves cats,
likes horror game or is up
for a challenge

NON-TARGET AUDIENCE

Someone who has
Clinical Anxiety or PTSD,
Thrill Avoiders and
Younger Audiences

PURPOSE

IDEA

How we came up with our idea

FUN FACTOR

How fun the game is?

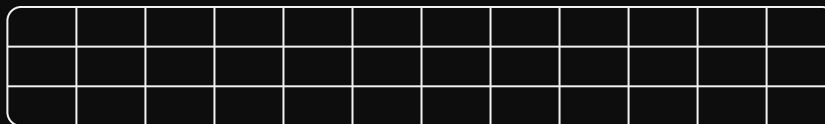

VALUE OF GAME

How useful is our game to society

TEAM IDEATION

TEAM IDEATION

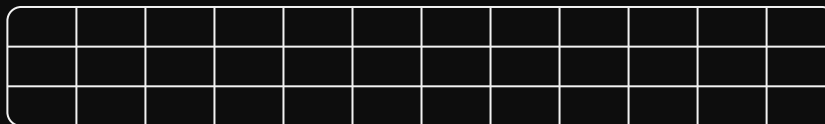

A team mate prefers horror genre, and to tie into the requirements of having player to experience a mundane scenario in a new way, we decided to have player take in the form of a house cat. In a lovely home all by itself, only to find that it is not alone..

Topic easily relatable, each team mate with different backgrounds contribute bits and pieces to solidify the idea as we progress.

FUN FACTOR

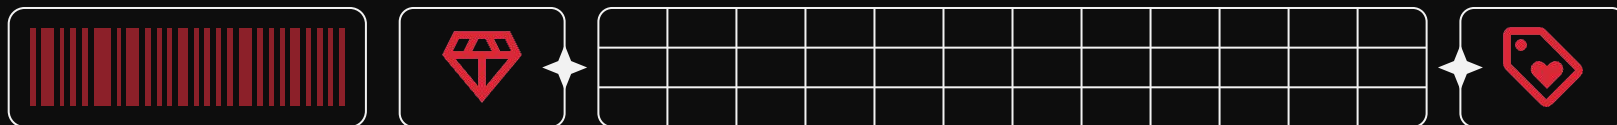

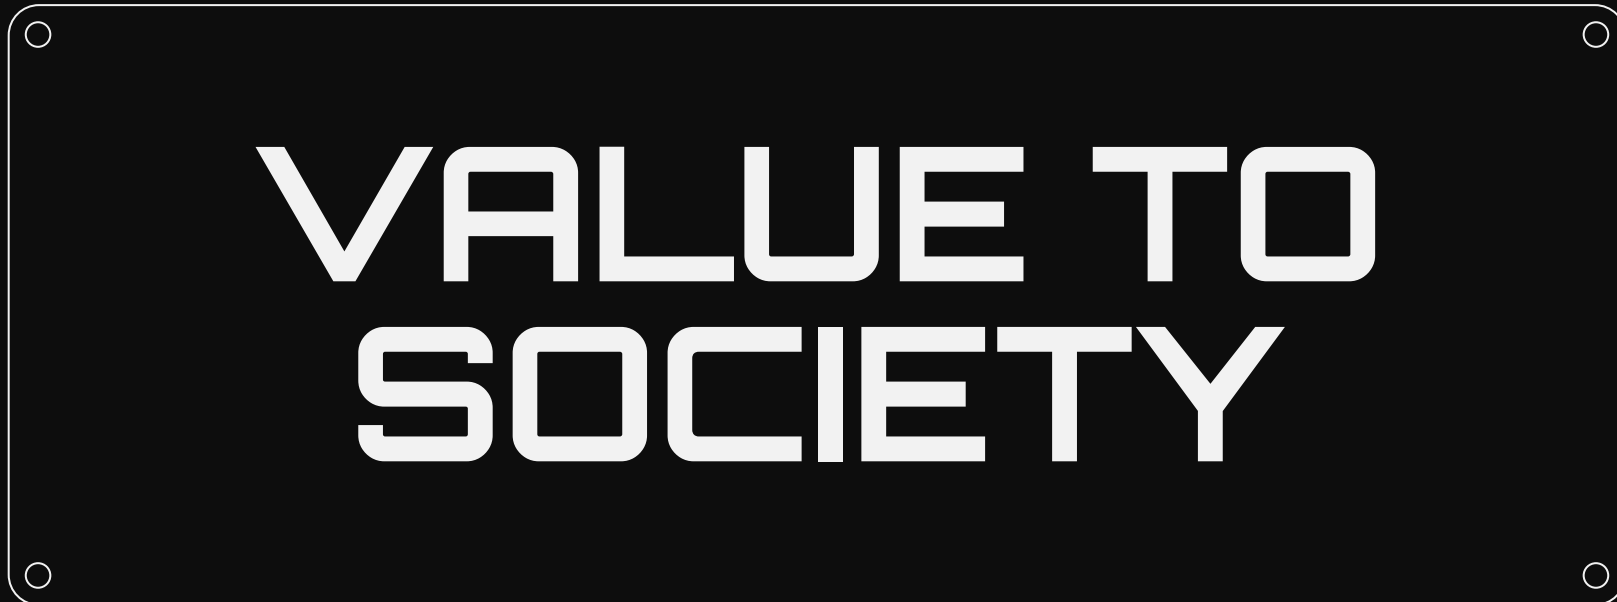

FUN FACTOR

- Assuming a non-humanoid role
- High player control vs good balance of skill and randomness (cat find corners to hide-under table where ghost will not be able to injure)
- Mastery- as player found ways to squeeze in tight corners and controlling lights, satisfaction of skills acquired will be a reward that is irreplaceable by those given. This also challenge players to be creative of hiding spots of old and new locations
- Beyond the game- awareness and observant of cat's behaviour.

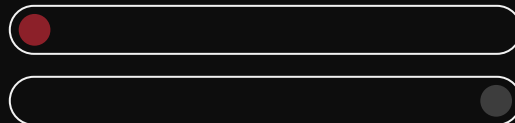

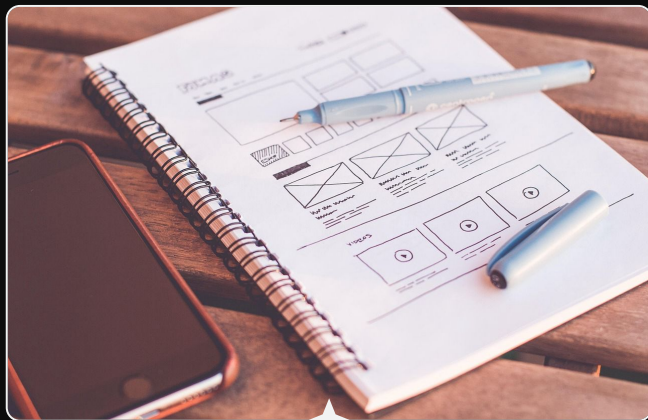

VALUE TO SOCIETY

- Empathy. Cat's lower POV. Connection. Player to player (discussing cat strategy), player to animal.
- build the players courage, confidence, resilience and patients.
- Helps reflect the absurdity of reality, of humor, familiarity/ unfamiliarity, and horror in daily life that everyone goes through. All packaged in Happy Cat House game.

03

GAMEPLAY AND DESIGN

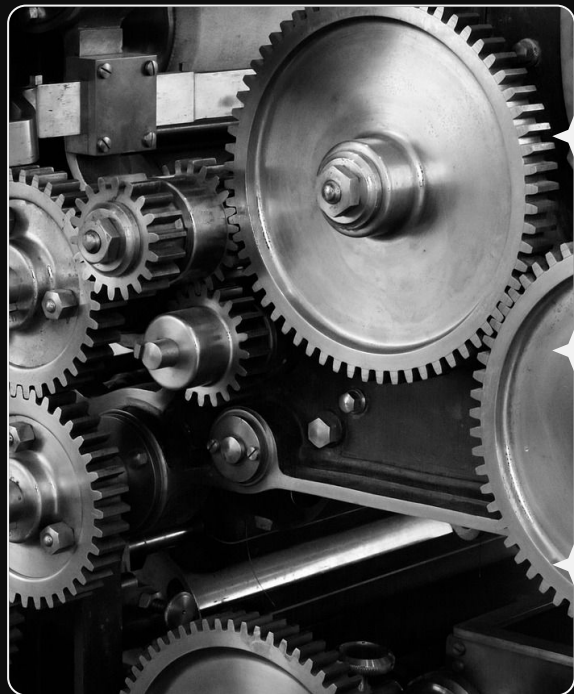

Audience and Fun factor

GAME FEATURES & MECHANICS

- Play as a cat in a haunted house
- Explore different areas of the house
- Avoid ghosts that roam the environment
- Stay in lighted areas to remain safe
- Interact with lamps and other objects
- Manage your health and survive as long as possible
- Game Over when the cat's health reaches zero

AIM OF THE GAME

- Survive for as long as possible by avoiding ghosts and staying in lighted areas.
- The game ends when the cat's health reaches zero.

Through the perspective of a cat, players gain a better understanding of the challenges animals may face and develop greater awareness of animal welfare.

DESIGN CHOICES

This game combines horror and exploration, using a semi-simplified art style with realistic lighting to support its atmosphere.

Although the models use simplified geometry, their proportions remain true to real life, helping the environment feel familiar and immersive.

The opening main menu is also trying to contrast the reality of the game

TECHNICAL IMPLEMENTATION

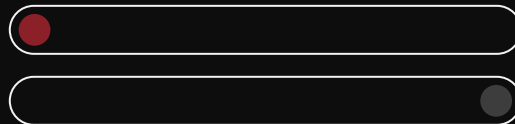

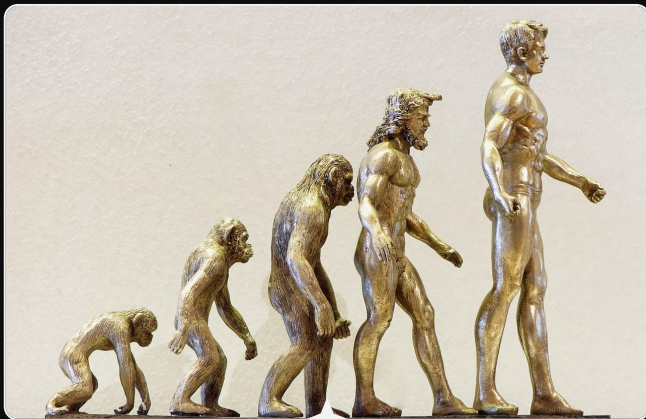

We used Unity as our game engine and Visual Studio Code for C# scripting.

Free 3D assets were obtained from CGTrader and animated using Blender. Music for the main menu was arranged using MuseScore Studio 4 with the Kontakt plugin, while ambient sounds and sound effects were sourced from Pixabay.

All assets were integrated into Unity to create the final gameplay experience.

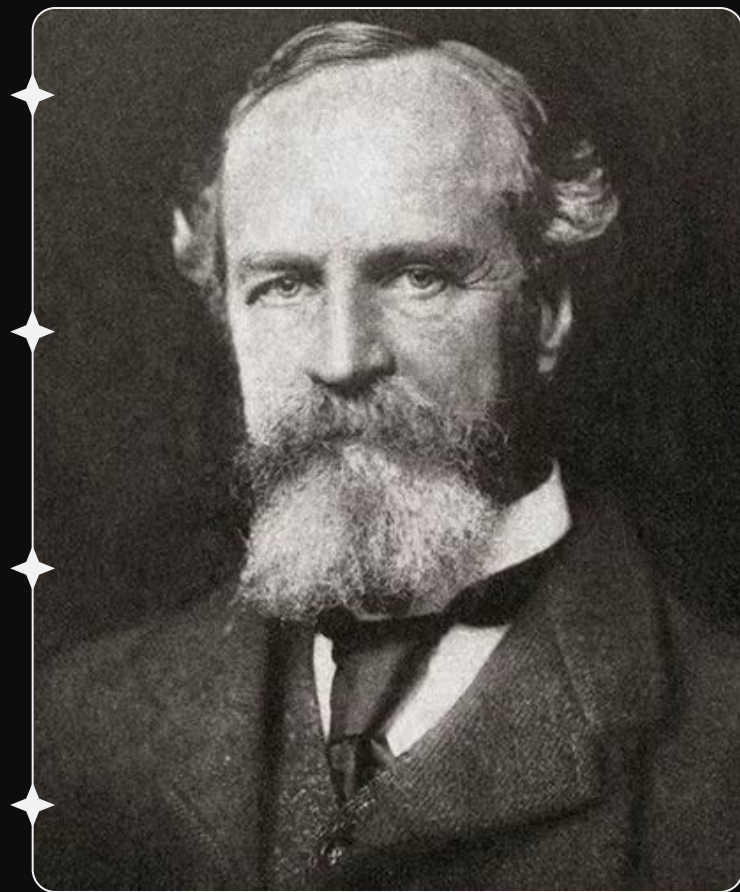

FUTURE PLANS

Time is our biggest enemy

"The great use of life is
to spend it for
something that will
outlast it."

—William James

FUTURE PLANS

EASY

Add an Second level to the house and more houses, add customisation to the cat and new mechanic

MEDIUM

Have a complete story ending with the cat ending and adding new entities and ghost to the games

HARD

Add a leaderboard system, account login for multi device login, User made levels and multiplayer mode

LEVELS

STORY
