GAME CONCEPT

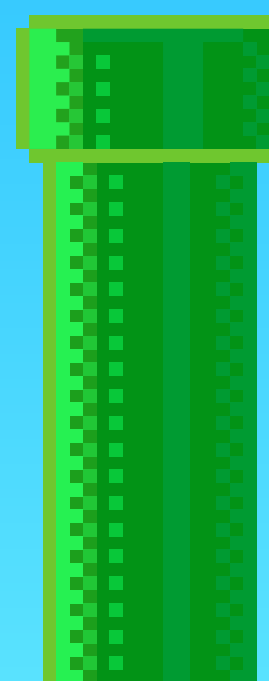

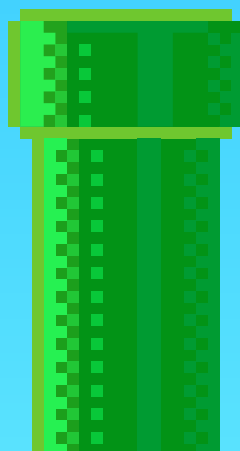

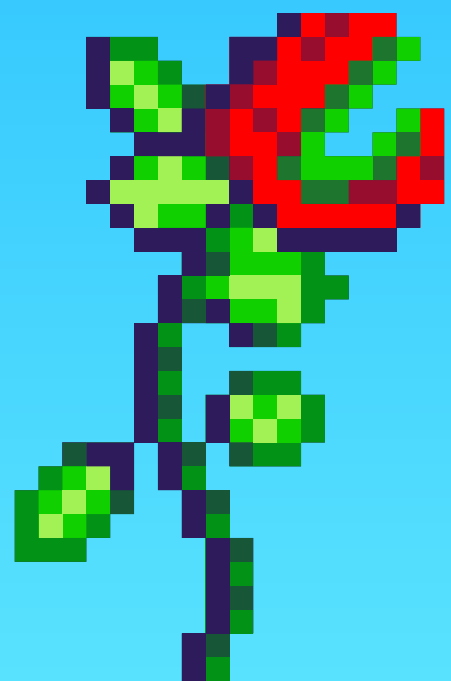

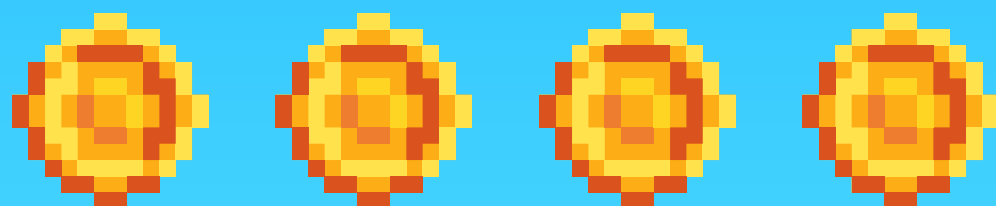

Game Concepts

2D combat-style
gameplay with
questions

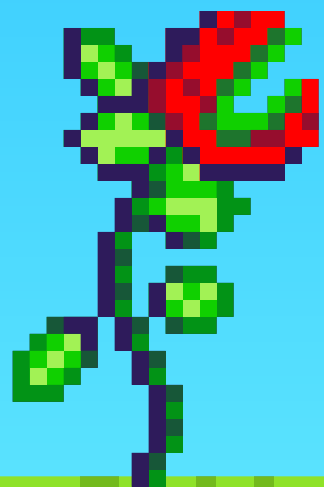

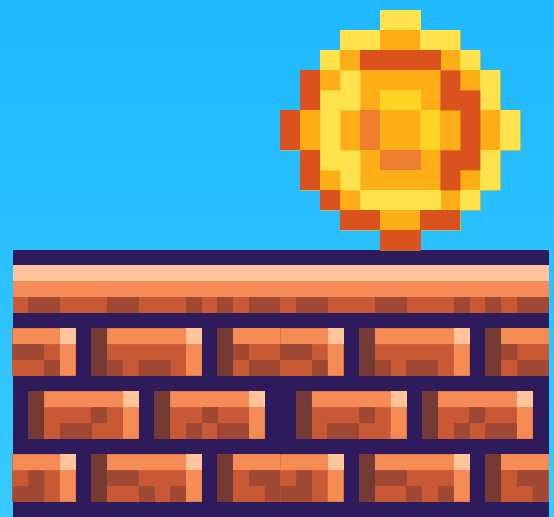

INTRODUCTION

Introduction

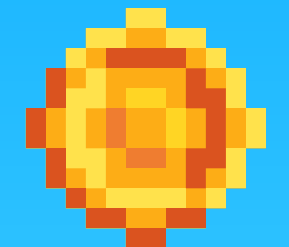

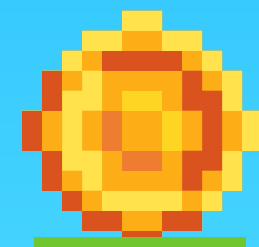

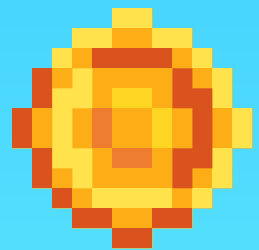

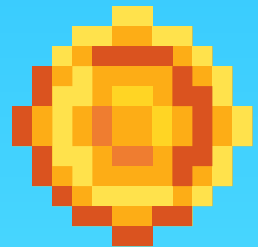

{ Target audience }

Beginner coders
looking for a fun and
engaging way to learn
Python

Introduction

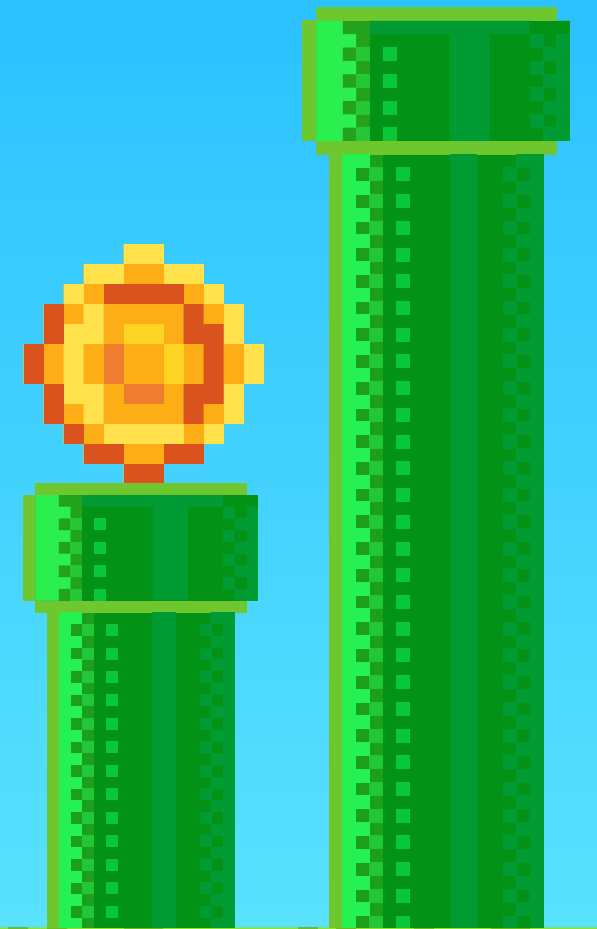

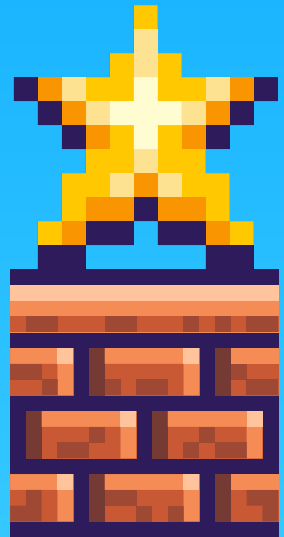

{ Aim of the game }
Clear all the levels of
the game
[and learn Python
basics :]

Introduction

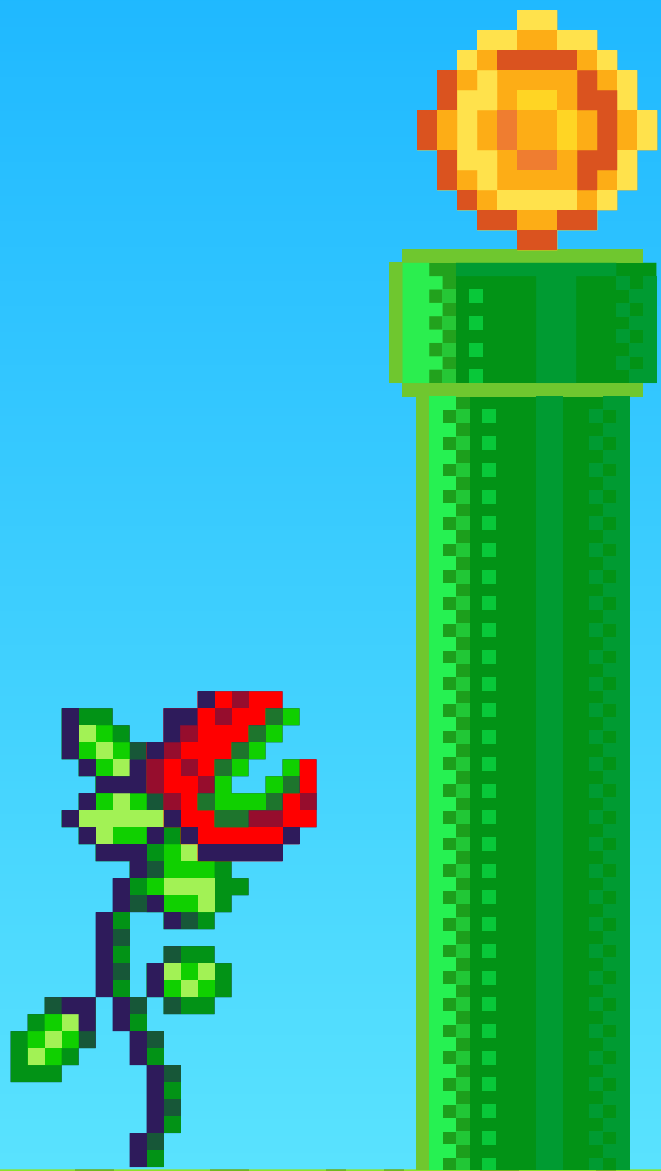

{ Aim of the game }

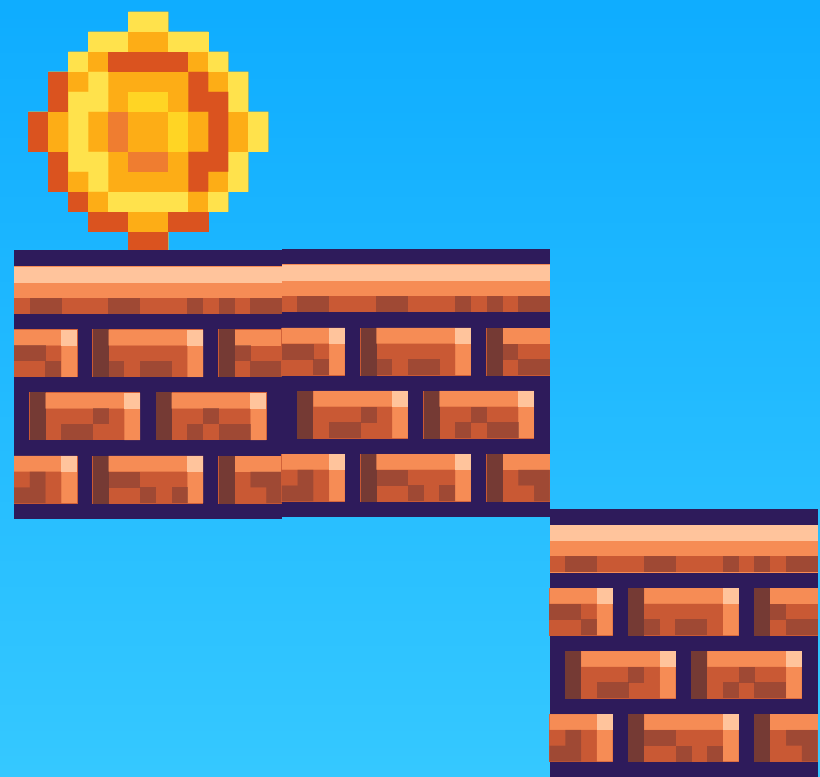

There are waves of
zombies to defend
against and upgrades to
boost your character

Introduction

After every wave, there will be a few questions to answer. Questions, when answered correctly, give buffs, coins, and restore health, while questions that are answered wrongly multiply the number of enemies in the next wave and do not give coins or restore health

Introduction

There are 6
types of
characters :

Enemy

+ Enemy

Archer

Barbarian

Fisherman

Knight

Sorcerer

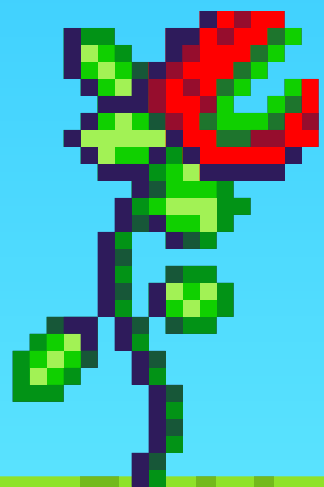

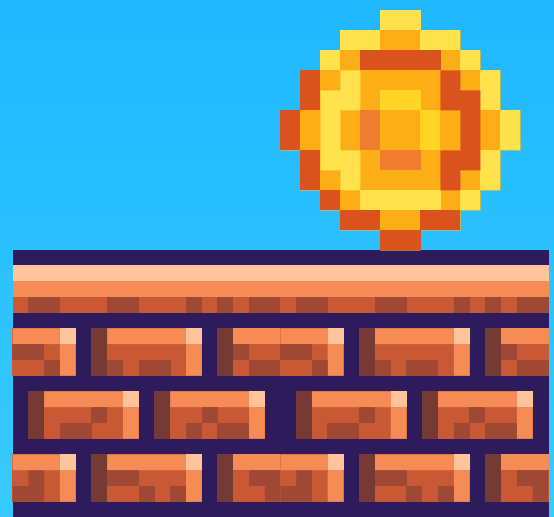

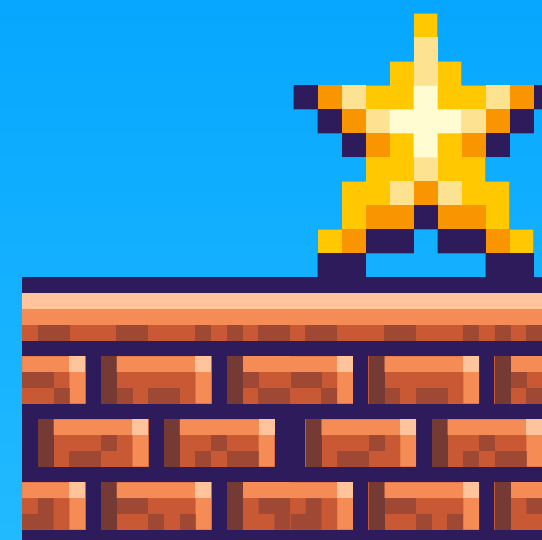

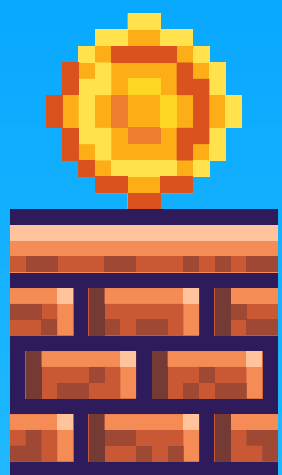

Witch

Introduction

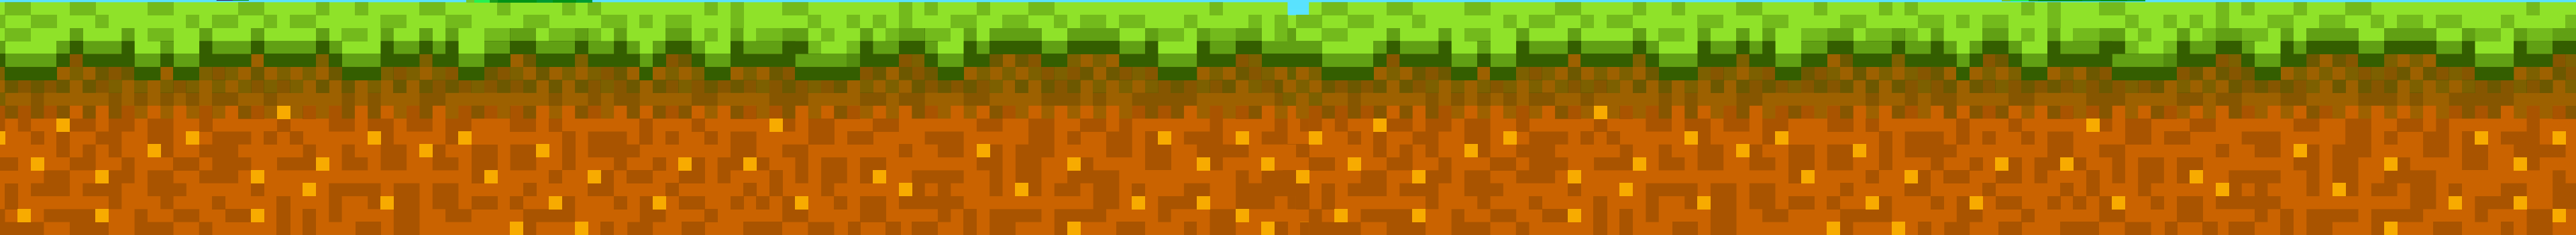

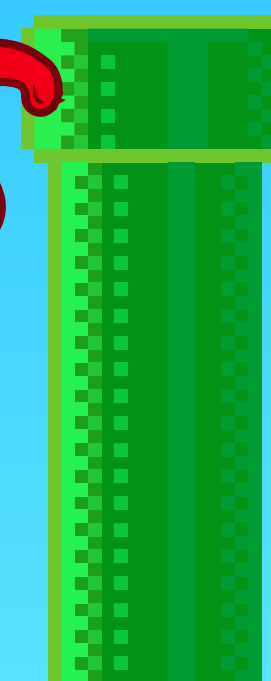

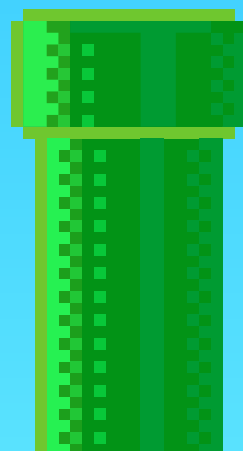

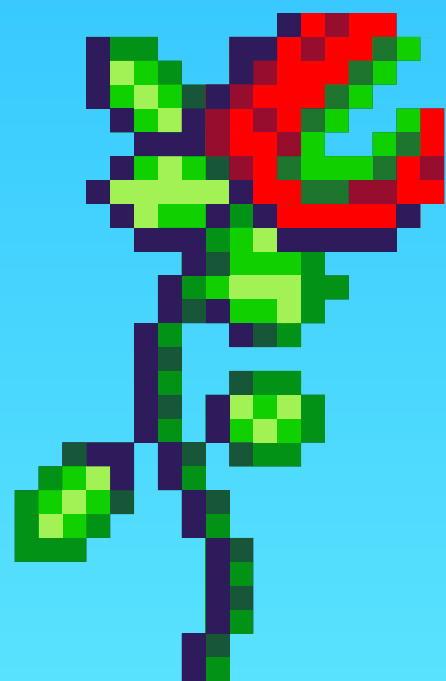

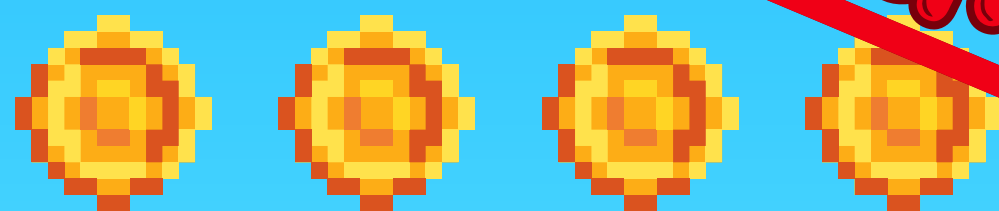

{ Fun / Useful? }

It's a combat game with
endless attack combinations
and strategies, and it also
teaches Python (win-win)

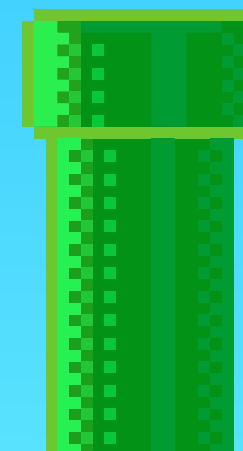

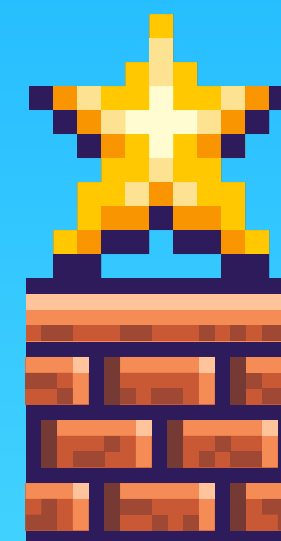

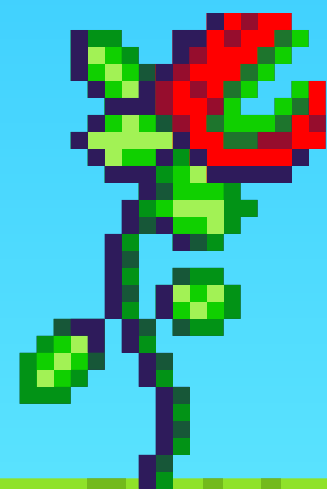

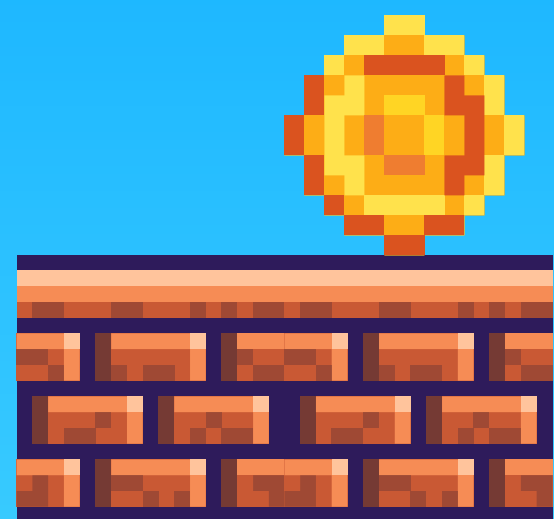

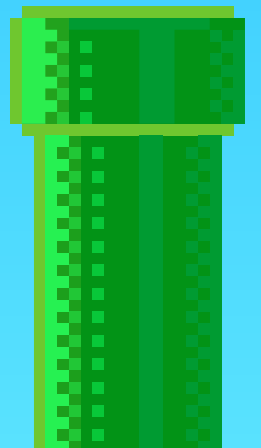

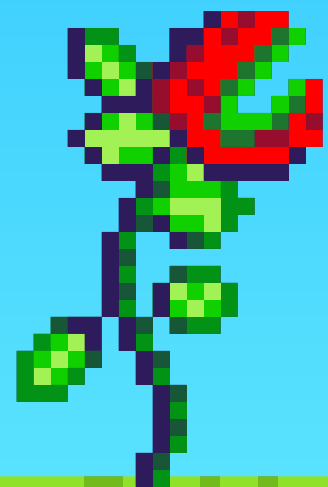

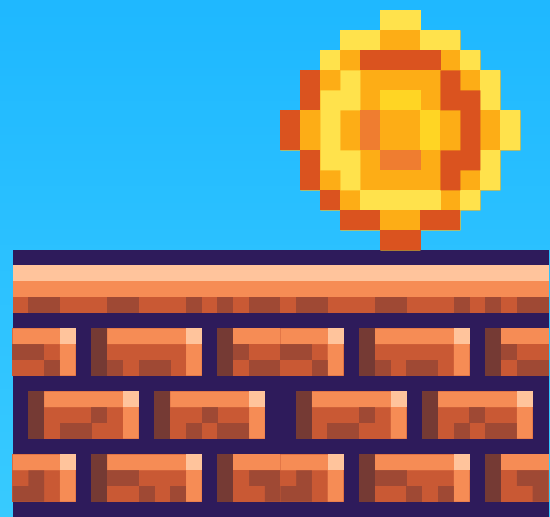

WORK IN PROGRESS DEMOGRAPHIC PROTECTION

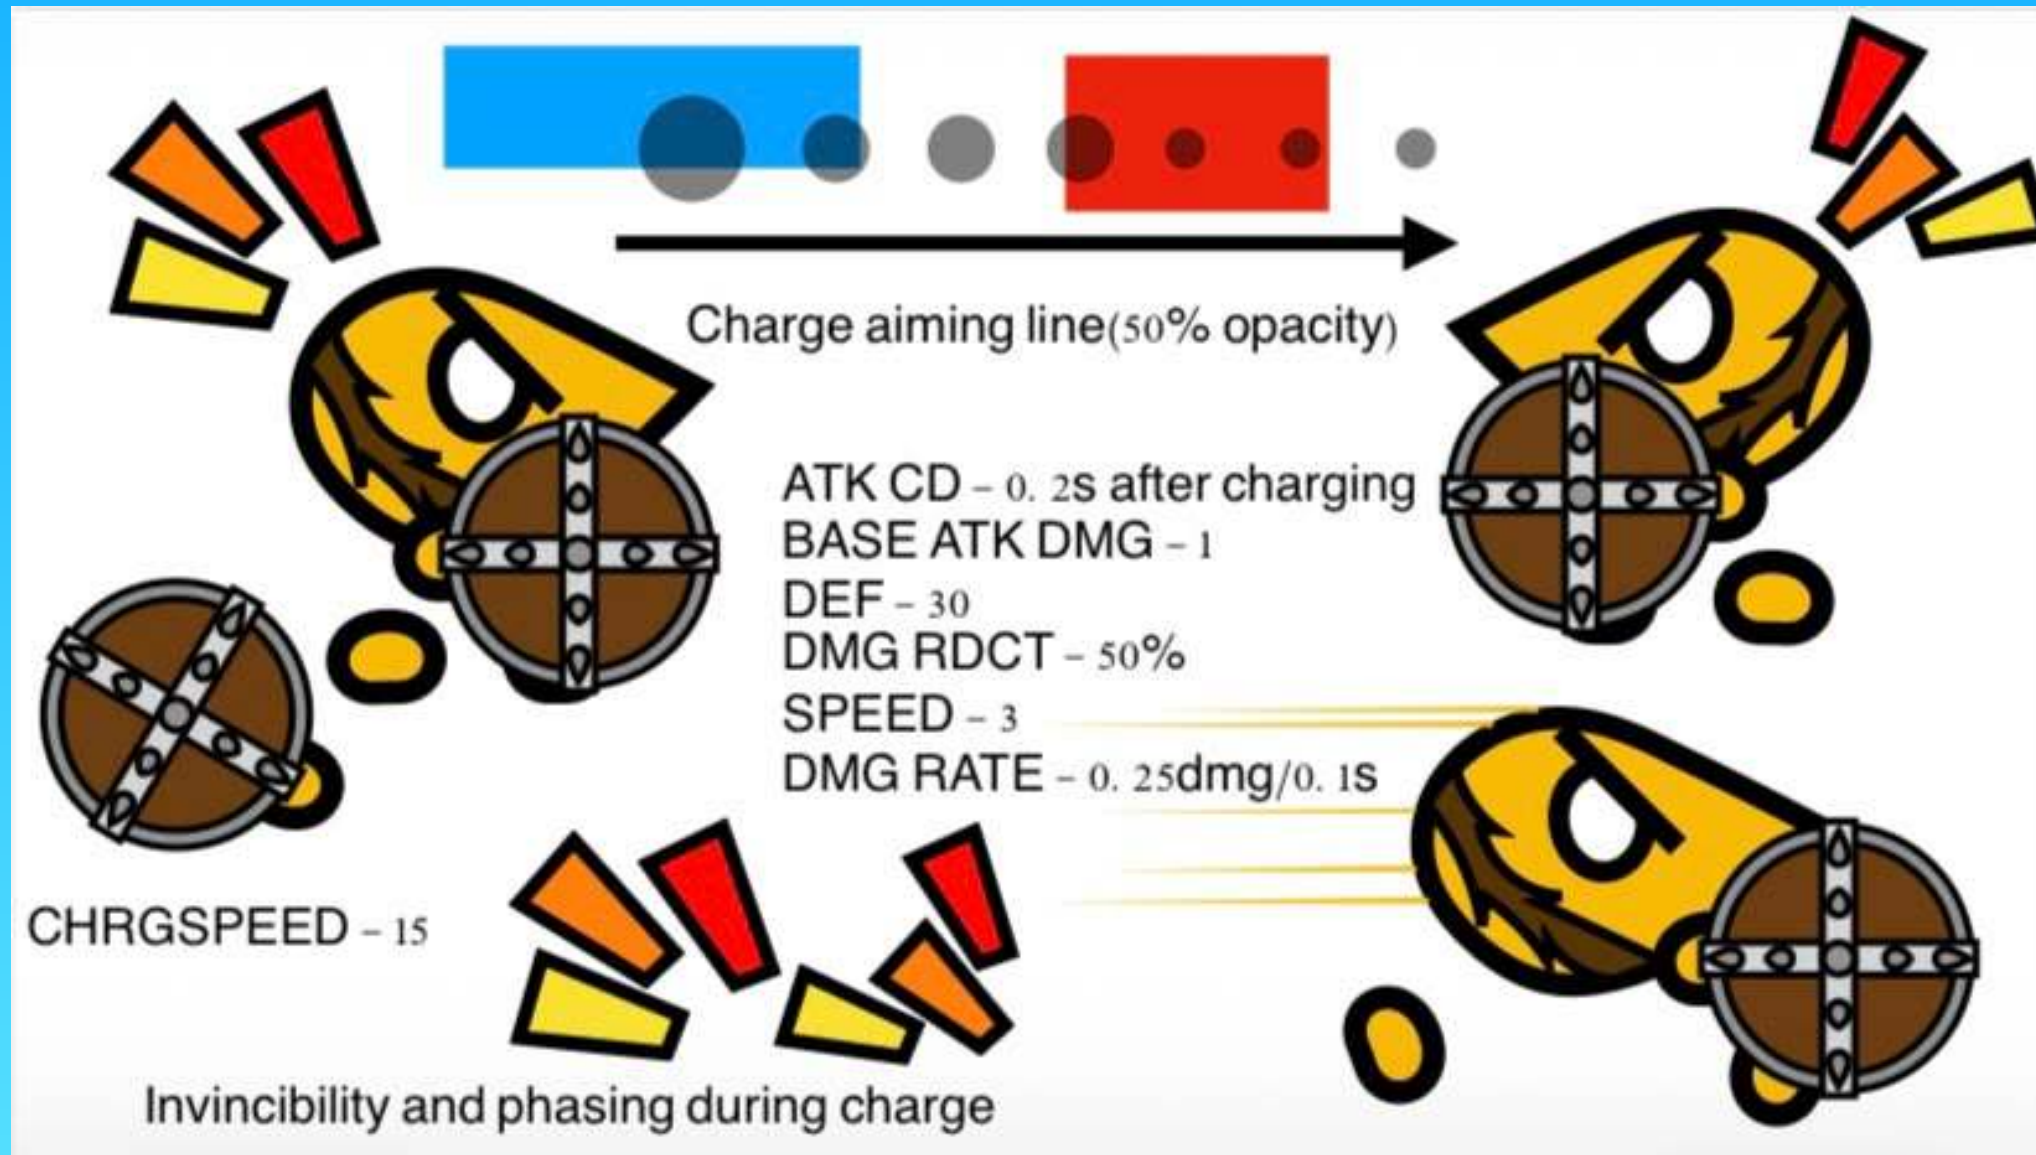

Map

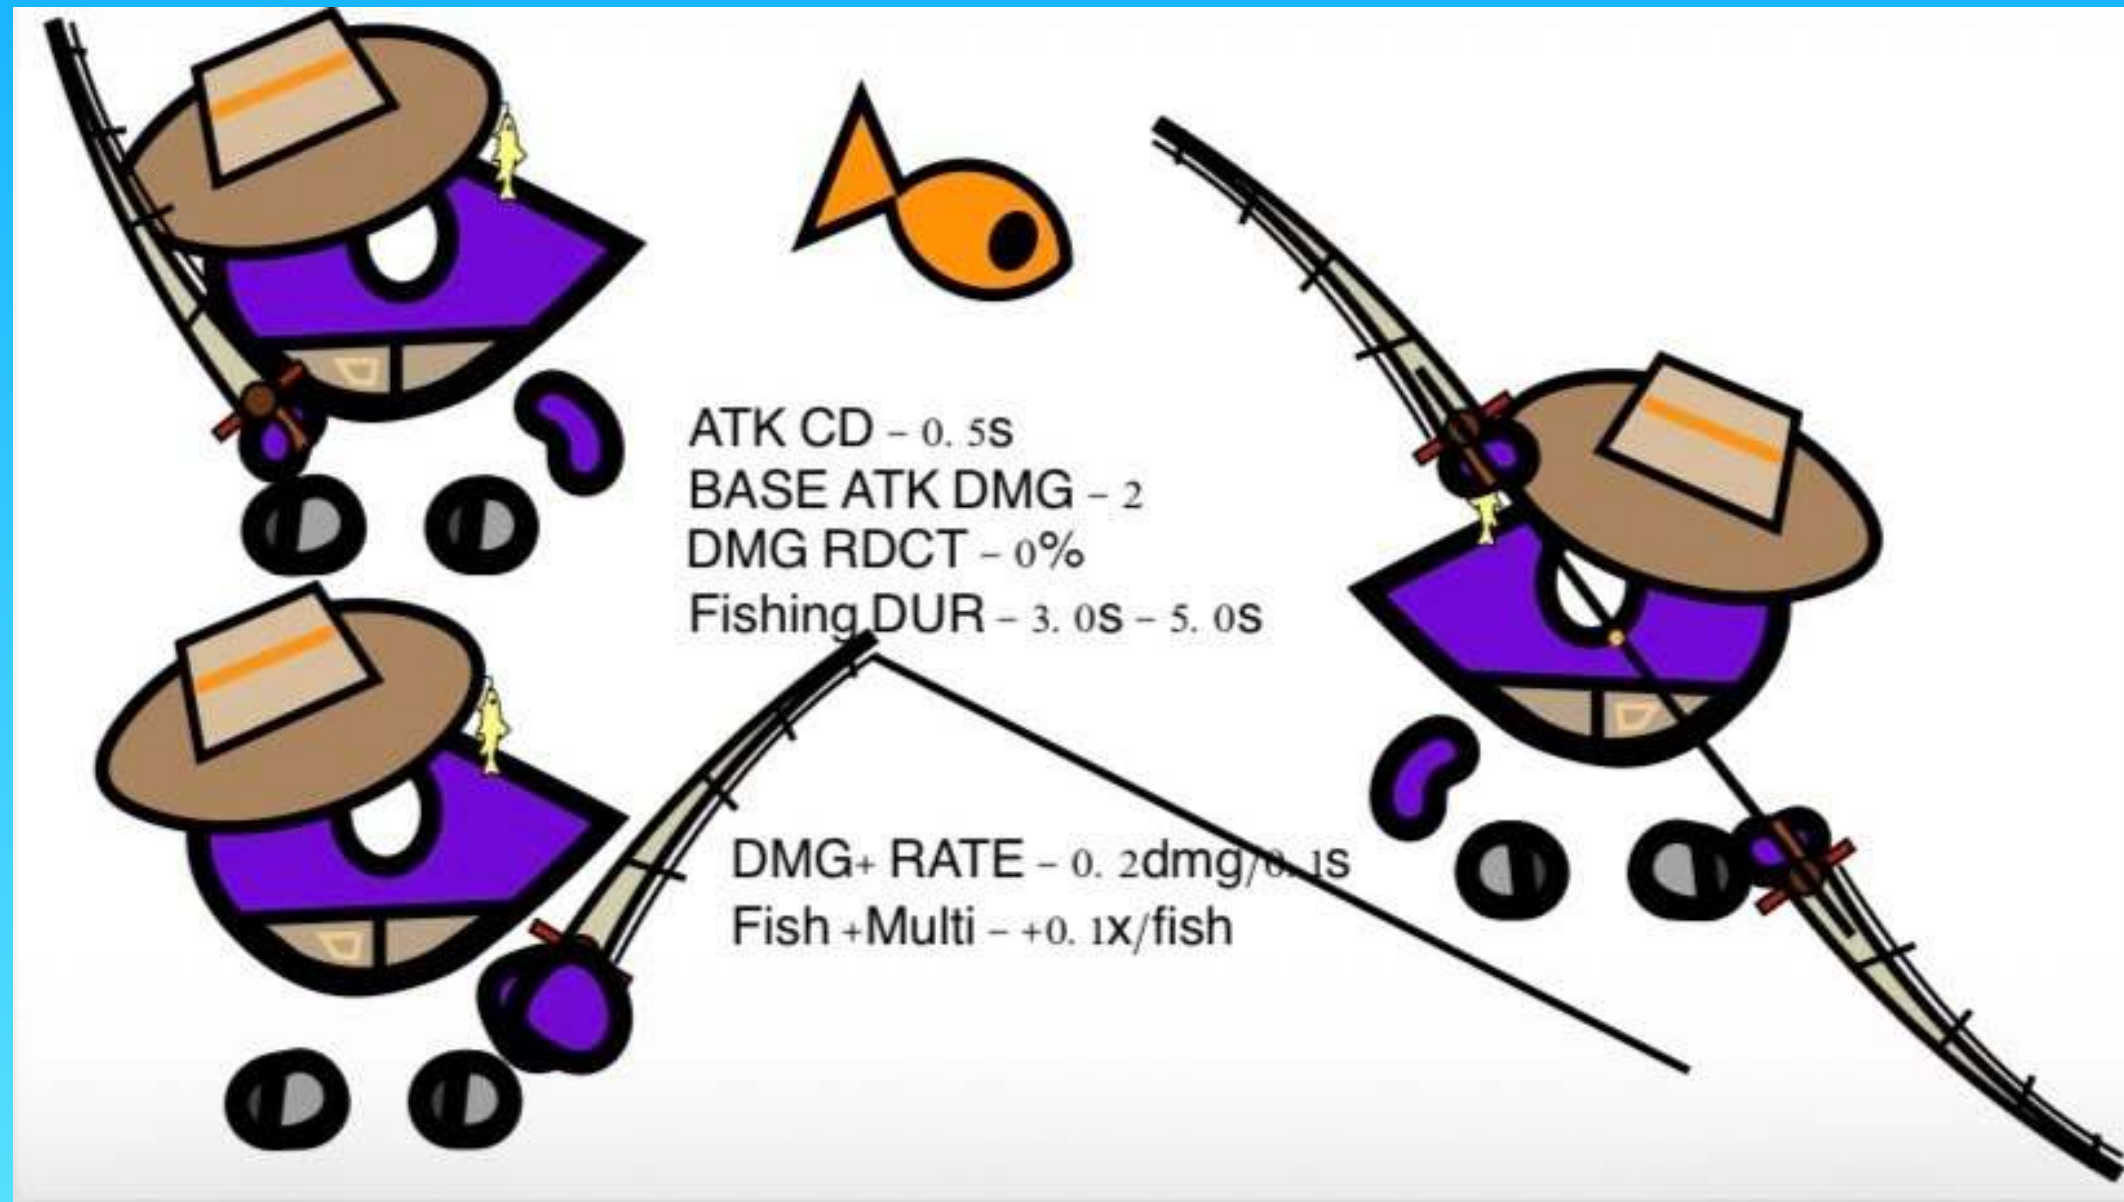

Archer

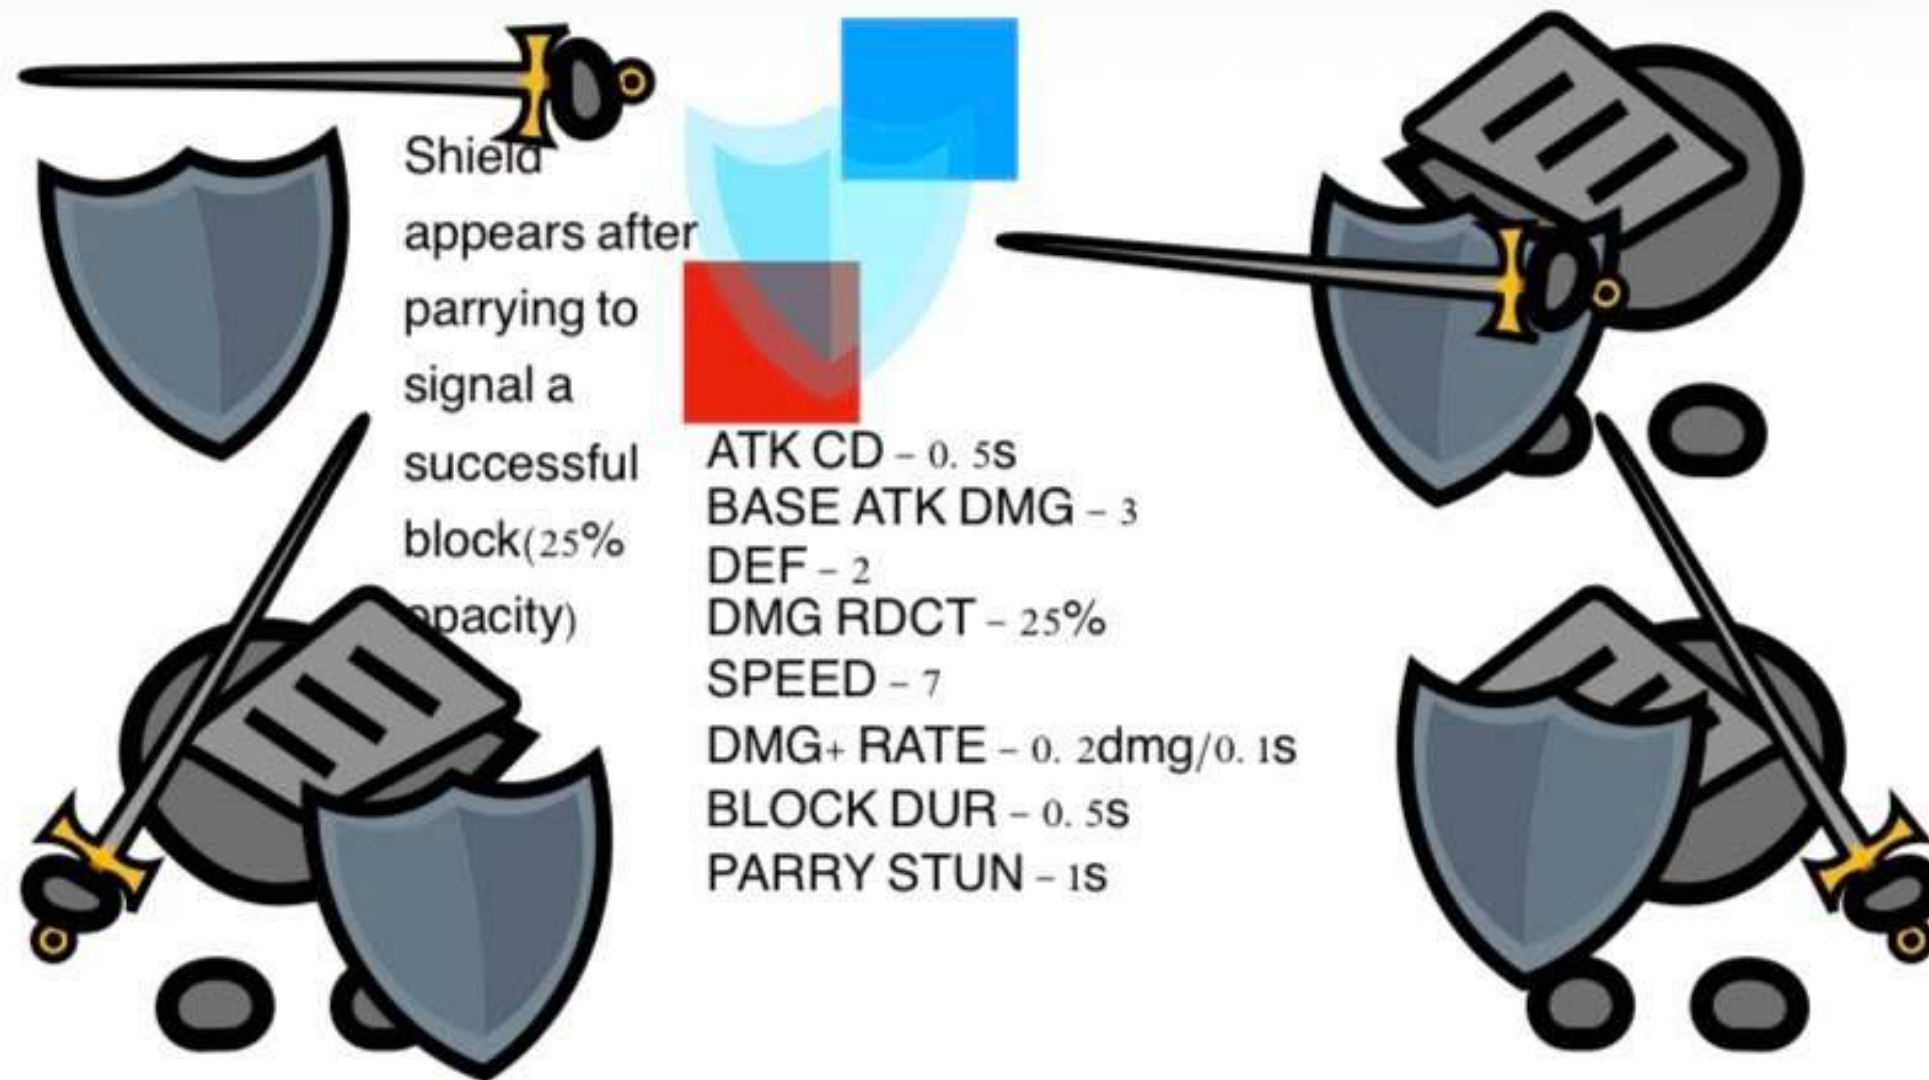

Barbarian

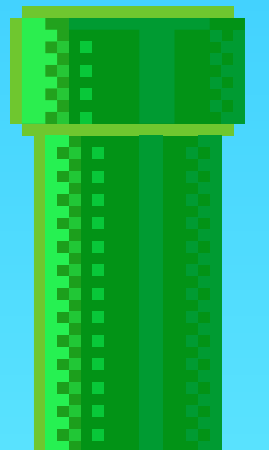

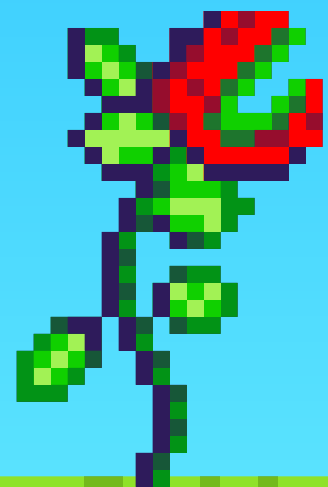

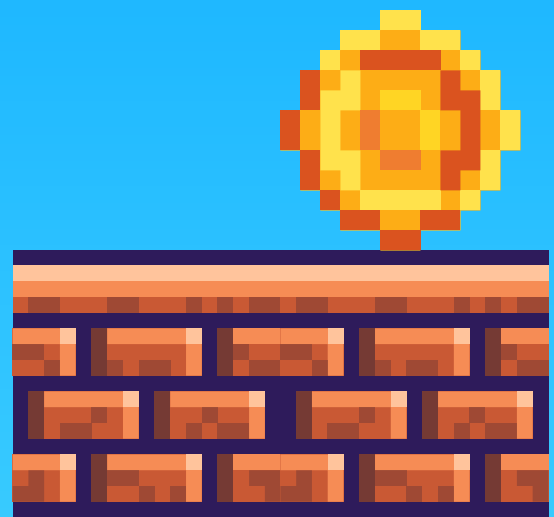

Fisherman

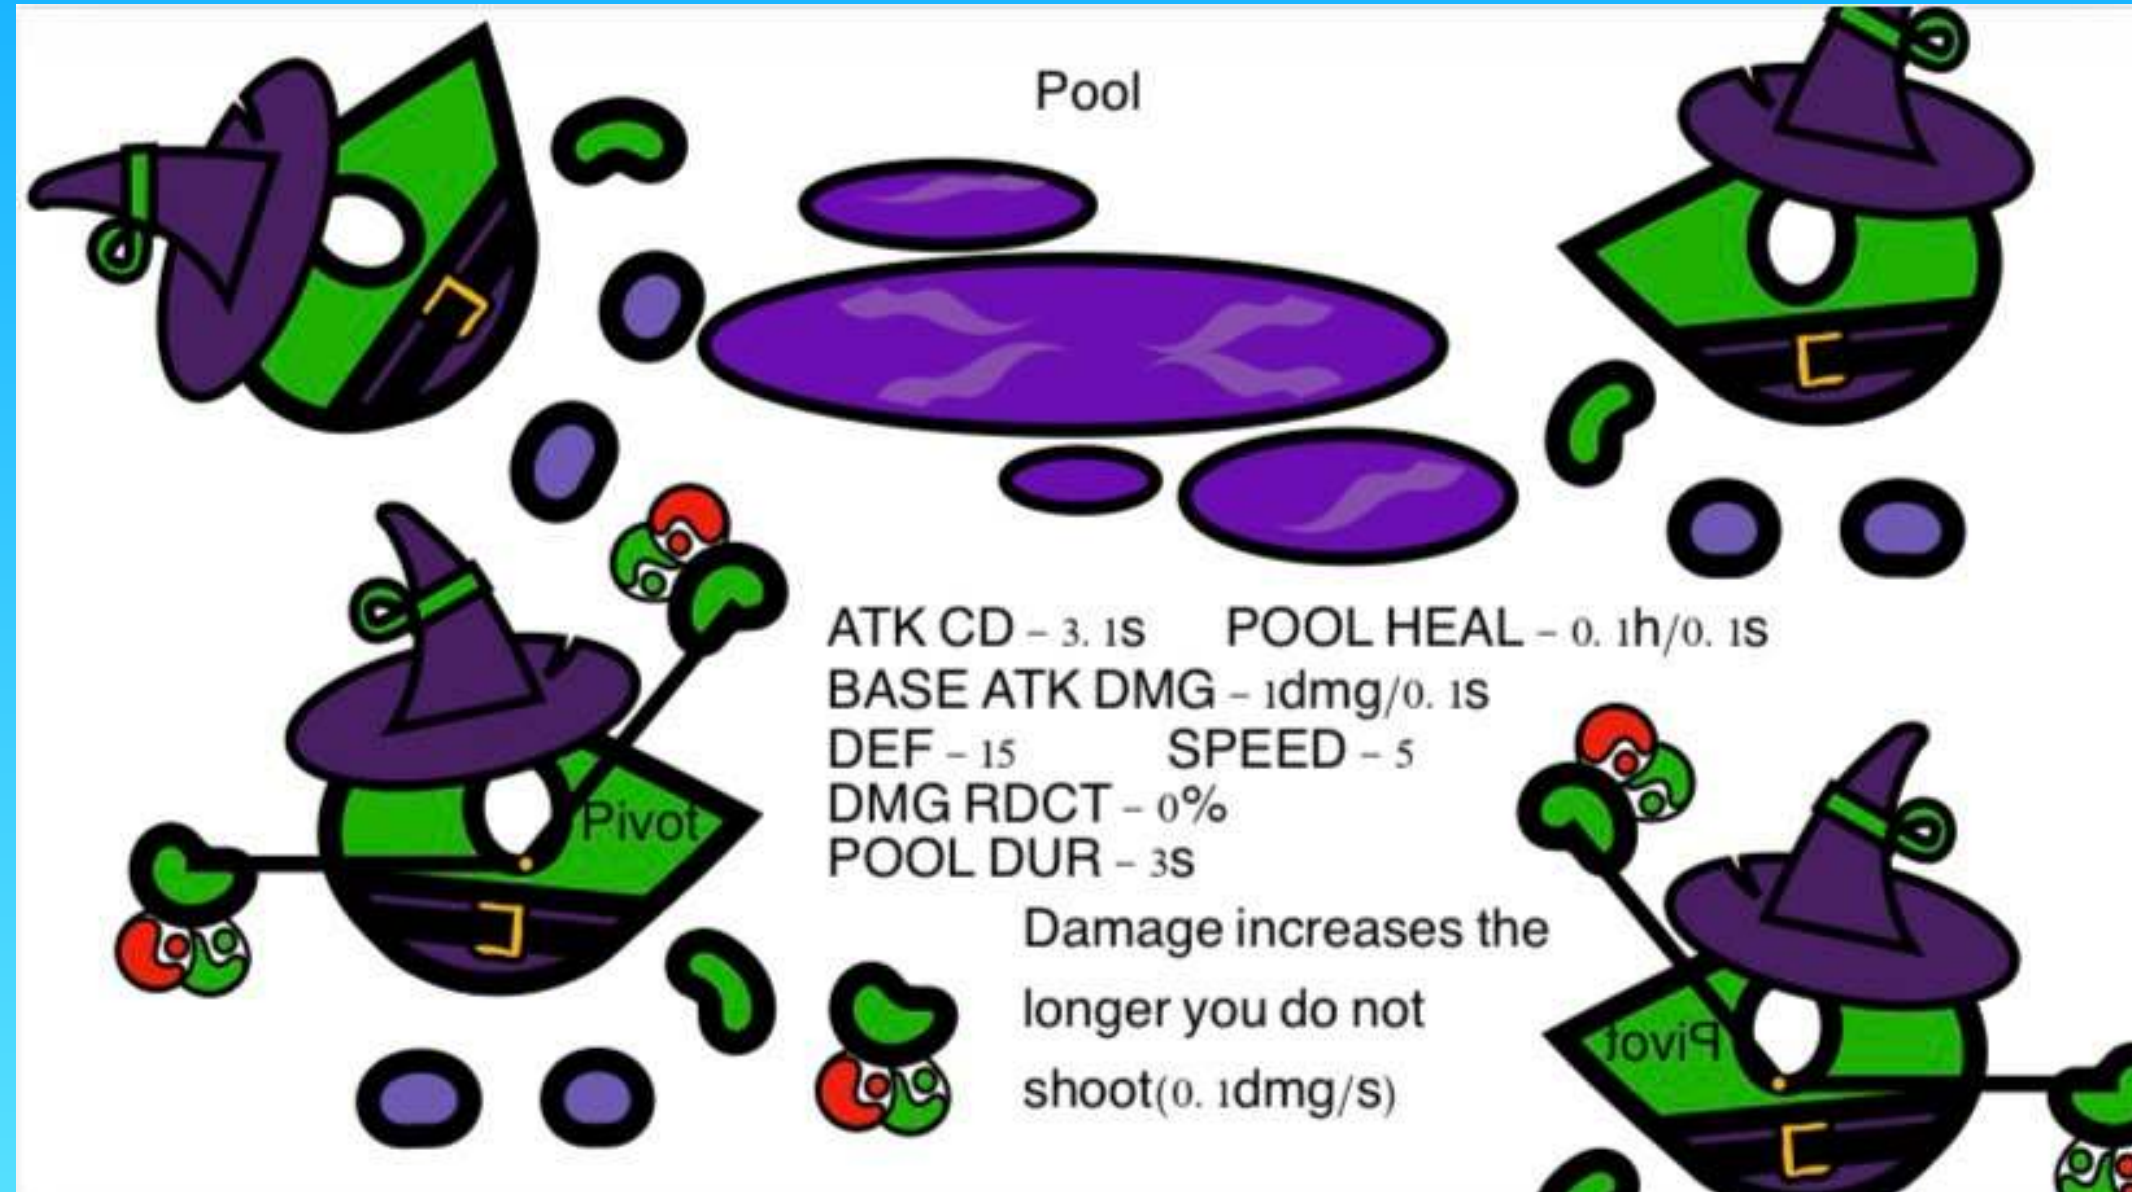

Knight

Sorcerer

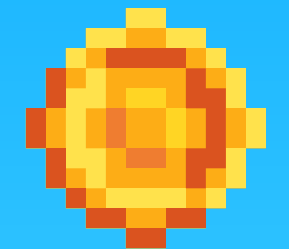

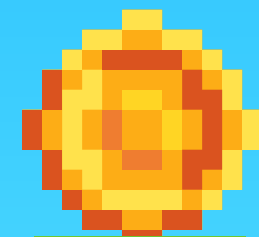

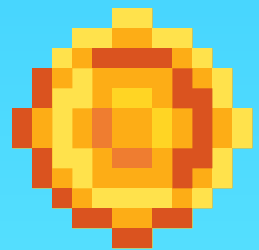

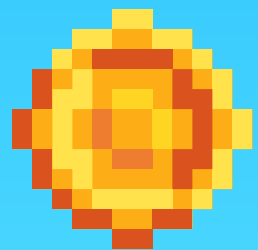

Witch

Others

{ Design Choices }

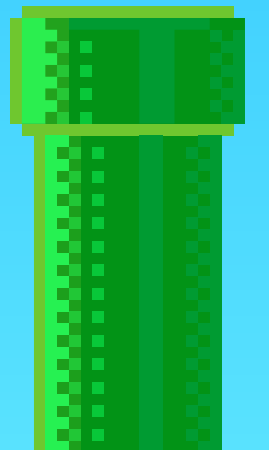

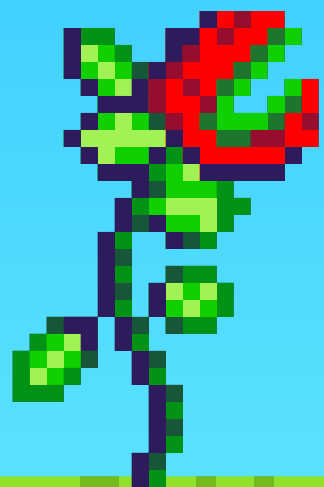

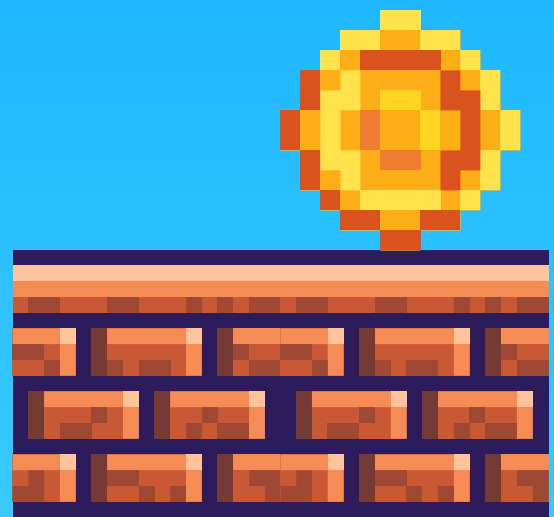

We went for a simple and original design for the characters since we wanted the game to be simplistic

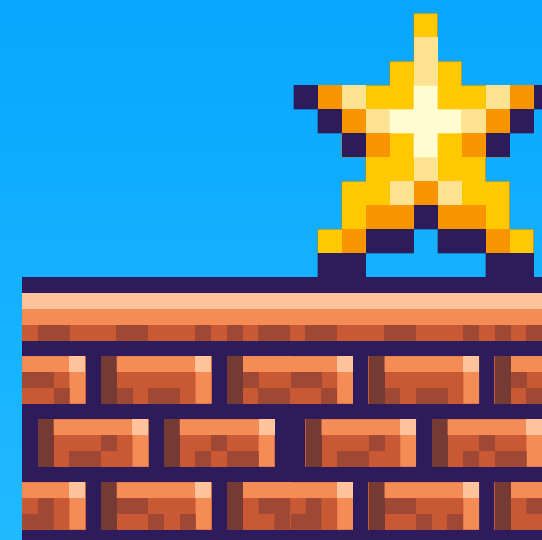

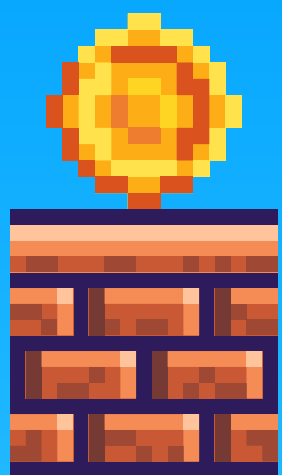

Others

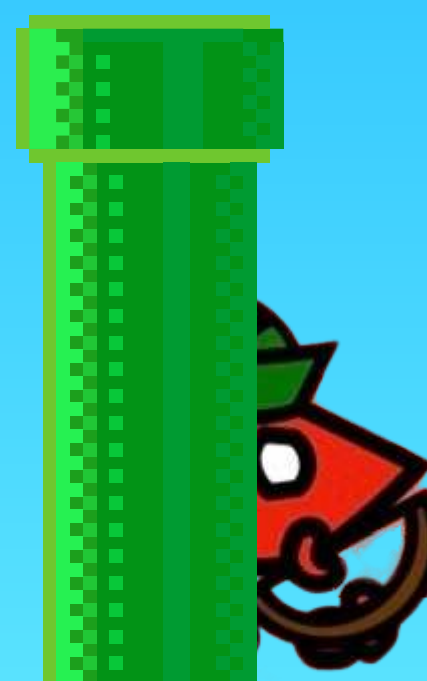

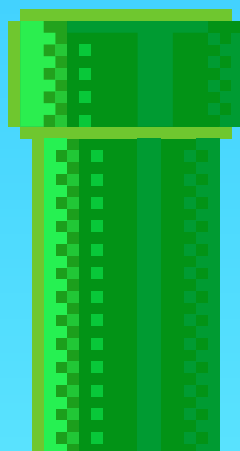

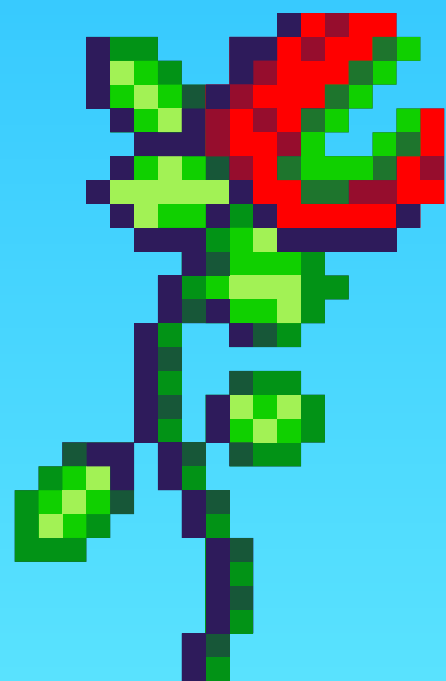

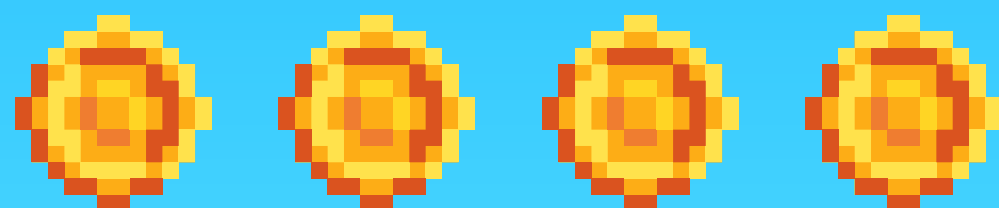

{ Technical Implementations }

We used things we learnt,
such as the Hp system and
bullet system

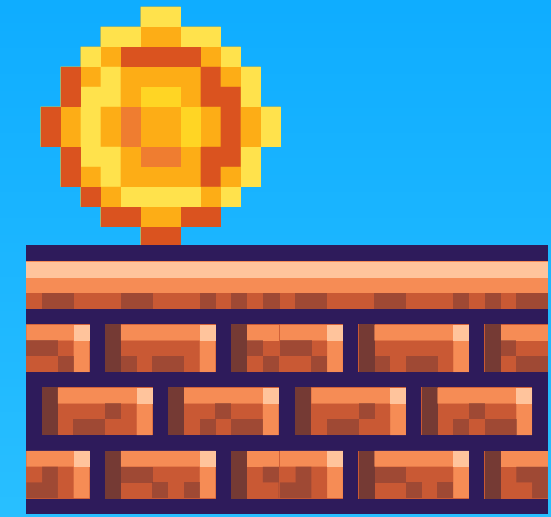

FUTURE DEVELOPMENTS

Future Developments

You can
upgrade the
characters:

Archer

Sniper

Soldier

Fisherman

Seafarer

Pirate

Sorcerer

Necromancer

Immortalist

Barbarian

Viking

Tyrant

Knight

General

Commander

Witch

Alchemist

Enchanter

P.S. HOW MANY
ARCHERS DID YOU
SPOT IN THE
SLIDES?

THANKS FOR LISTENING

END
