

LEGEND-BLAST

The Grid RPG Reinvented

2026 June Jam Hackathon

Everyday Routine Reimagined: Puzzle to Combat

THE DEVELOPERS

Lead Designer

Driven by the vision to merge casual mechanics with hardcore RPG intensity.

Technical Lead (Aeric)

Architect of the roguelike systems and combat balancing.

Collaboration

Born from the high-pressure environment of exam week and sleep deprivation.

THE CORE VISION

"Why just clear blocks when you can charge a blade? We took the mundane act of organizing shapes and turned it into survival."

CORE MECHANICS

Block Blast Grid

Classic 8x8 spatial management gameplay that forms the foundation of every encounter.

Combat Trigger

Every line cleared translates directly to a physical attack, turning logic into lethality.

Strategic Risk

Balancing block placement speed against precise combo setups for maximum damage output.

BOSS BATTLES

Relentless Cooldown

Experience high-stakes combat against massive enemies. The boss operates on a constant, unyielding timer.

Beat the Clock

If you fail to act before the timer hits zero, the boss strikes. It's a race between your spatial logic and the enemy's fury.

$$\text{Damage} = (\text{P}_{\text{atk}} + \text{Lines} + \text{Bonus}) \times \text{Combo}$$

ROGUELIKE PROGRESSION

Might

Increase base attack power. Ideal for those who clear lines one-by-one with speed.

Combo

Massive multipliers for multi-line clears. Rewards the patient strategist.

Vigor

Restore health and expand your pool. Essential for surviving late-game bosses.

TECHNICAL HURDLES

Real-Time Sync

Synchronizing a static grid detection system with a real-time combat coroutine was our biggest hurdle. We solved this with an event-driven damage queue.

Exam Week Crunch

Time was our external boss. We focused on high-impact MVP (Minimum Viable Product) features first, ensuring the core loop was polished before adding variety.

VISUAL FEEDBACK

Dynamic HUD

Minimalist gauges for Boss HP and Attack Timers ensuring critical information is clear at a glance.

Screen Flashes

Color-coded visual responses for player hits and damage taken provide immediate combat feedback.

Intuitive Flow

Drag-and-drop mechanics feel weighted and responsive, making every interaction feel impactful.

THE JOURNEY

Story Mode Progression

Like *Candy Crush*, players traverse a world map of scaling difficulty. Each level introduces new boss mechanics, shorter timers, and unique environmental hazards.

The meta-progression keeps players engaged between short, intense puzzle rounds.

“

"Great games don't just innovate on mechanics; they innovate on how the player feels during the most basic tasks."

— The Legend-Blast Philosophy

FUTURE DEVELOPMENTS

Elemental Blocks

Fire, Ice, and Lightning modifiers for strategic depth.

Multiplayer

Asynchronous PvP where clears send blocks to opponents.

Infinite Mode

Procedurally generated bosses for ultimate replayability.

V2.0 Launch

Full cross-platform release on mobile and PC.

QUESTIONS?

Thank you for following our development journey!
